Thank you for purchasing our furniture with solid wood!

Now that you have our product in your home,we want to provide you some tips that will help to keep your furniture looking great for many years to come.

Many of the collections we produce use lumber with specific characteristics such as mineral streaks,knots,worm holes, striped or tiger wood,and probably natural tiny splits on the surface.These characteristics are not defects,they are Mother Nature ' s signature that can be found in certain species of wood.Since every tree is different,there may be wide variations in color,graining,marking,or shading on the same piece and between different pieces of furniture.

We use a lacquer coat as our final finishing process,which adds to the great depth and clarity of our finish.Lacquer finishes may be cleaned by wiping the surface with a soft cloth dampened with water.Our recommended cleaning soloution is to mix one tablespoon of vinegar to one quart of water.Use a soft cloth and wipe follow the grain.Use another clean,soft cloth to wipe up and excess liquid to make certain the surface is completely dry.

NOTE:SCREWS LOOSEN WITH USE.CHECK FOR LOOSE SCREWS AND TIGHTEN EVERY 6-8 WEEKS.

CLEANING INSTRUCTIONS:

If necessary, clean & polish all surfaces after assembly with a soft cloth and industrial furniture polish.
