 IAPMO Research and Testing, Inc. is a product certification body which tests and inspects samples taken from the supplier's stock or from the market or a combination of both to verify compliance to the requirements of applicable codes and standards. This activity is coupled with periodic surveillance of the supplier's factory and warehouses as well as the assessment of the supplier's Quality Assurance System. This testing is subject to the conditions set forth in the characteristics below and is not to be construed as any recommendation, assurance or guarantee by IAPMO Research and Testing, Inc. of the product acceptance by Authorities Having Jurisdiction.

This certificate is not evidence of current listing. To verify listing status, visit the IAPMO R&T Product Listing Directory at old.iapmo.org

Effective Date: March 2019 Void After: March 2024

Issued To: Ningbo Wanhai Cartridge Technology Co., Ltd
Xiachen Zone, Chunhu
Penghua, NINGBO 315538
China

Identification: Each fitting component shall bear permanent legible markings to identify the manufacturer. This marking shall be the trade name, trademark, or other mark known to identify the manufacturer. The product shall also bear all other markings required by the standard. The marking shall be applied so as to be visible after installation. The product or packaging shall also bear the cUPC® certification mark along with the term "COMPONENT" above.

Characteristics: Plumbing fixture fitting components to be installed in accordance with the manufacturer's instructions and the requirements of the latest edition of the Uniform Plumbing Code.

Products listed on this certificate have been tested by an IAPMO R&T recognized laboratory. This recognition has been granted based upon the laboratory's compliance to the applicable requirements of ISO/IEC 17025.

Products are in compliance with the following code(s):

Tim Colberg
Chairman, Product Certification Committee

Ron Chan
CEO, The IAFMO Group

This listing period is based upon the last date of the month indicated on the Effective Date and Valid After Date shown above. INSTALLATION STEPS

This product has been inspected and debugged by the factory to the best condition. Please do not disassemble and assemble it yourself.

Before installing the product, please be sure to remove sundries and sludge from the water pipe to prevent sundries from blocking the product.

► Parameter:

Working water pressure: recommended water pressure 0.1-0.5MPa

Maximum water pressure: up to 0.8MPa

Maximum water temperature: up to 85°C

Suggested hot water temperature: 60°C

Ambient temperature: 5°C-45°C

This information is for installation masters or professionals, please give the instructions to users.

► Conditions of Use:

It cannot be used with non-pressurized heaters for indoor public health environments or other similar environments.

If the inlet water pressure exceeds 0.5Mpa, a pressure reducing valve must be installed to avoid excessive pressure in the hot and cold water pipes.

1. Determine where the concealed valve will be installed on the wall. Make a suitable hole in the wall (Figure 1).

2. Install the concealed box on the wall, and connect the G1/2 hot and cold water supply pipe with the "Hot water" sign on the left (Figure 2). Note: Ensure that the center line of the valve body is perpendicular to the wall and the upper plane of the concealed box is horizontal. Keep the plastic shield on the valve body during installation.

3. As shown in Figure 3 After finishing the wall decoration, Install the decorative sheet, decorative cover, spout and handle correctly.

CLEANING CARE

In order to keep the appearance of product clean, bright and good performance, please take care of the product as follows;

1. Rinse with water only and dry with soft cotton cloth;
2. Use mild liquid and colorless glass cleaner to remove surface dirt and scale film, or use polish without abrasive effect;
3. Do not use abrasive detergent, polish, emery cloth, paper towel or scraper, etc;
4. Do not use acid cleaner, or cleaner and soap with insoluble gran etc;
5. In the process of use, mud may accumulate in the bubbler and make the water flow show, The bubbler can be unscrewed, rinsed with water, and then installed back in place.
