Assembly Information

▪ Assemble screws

1. Screw up to half point to make sure all spots are lined up

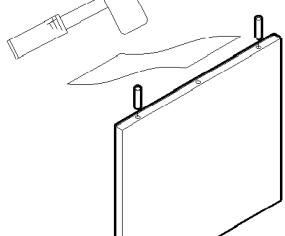

2. Tighten all screws

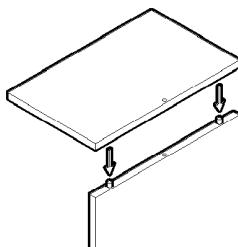

▪ Assemble Wood Dowels

1. Insert dowels into holes tightly

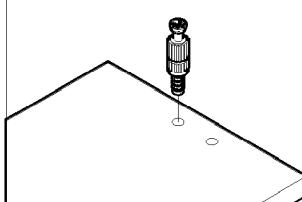

2. Attach the insert holes along with dowels

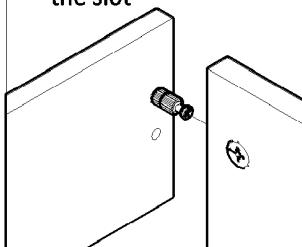

▪ Assemble Minifix

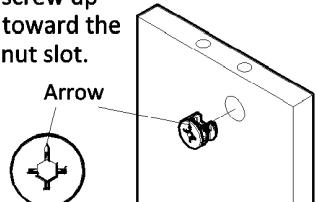

1. Screw Up Minifix M5X24MM into holes. Tighten all Minifix.

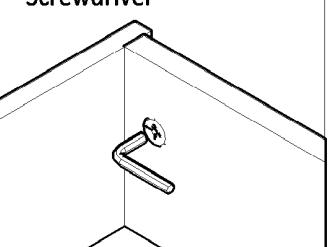

3. Insert Minifix M5X24mm and Minifix Casing together into the slot

2. Insert Minifix Casing into holes. Set the arrow of the screw up toward the nut slot.

4. Tighten the cam lock screw
※Use Allen Key or Screwdriver

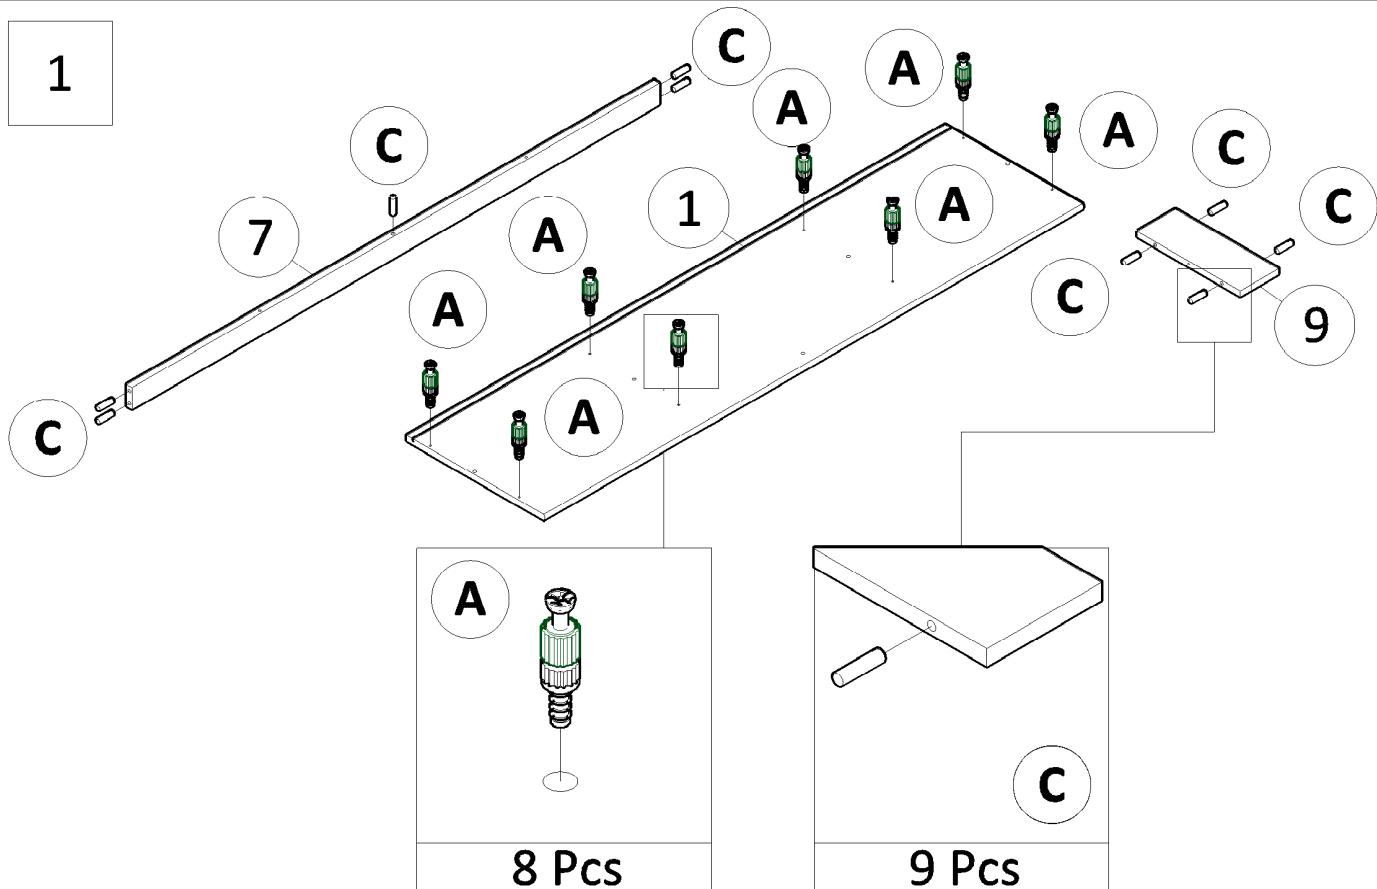

Assembly Step

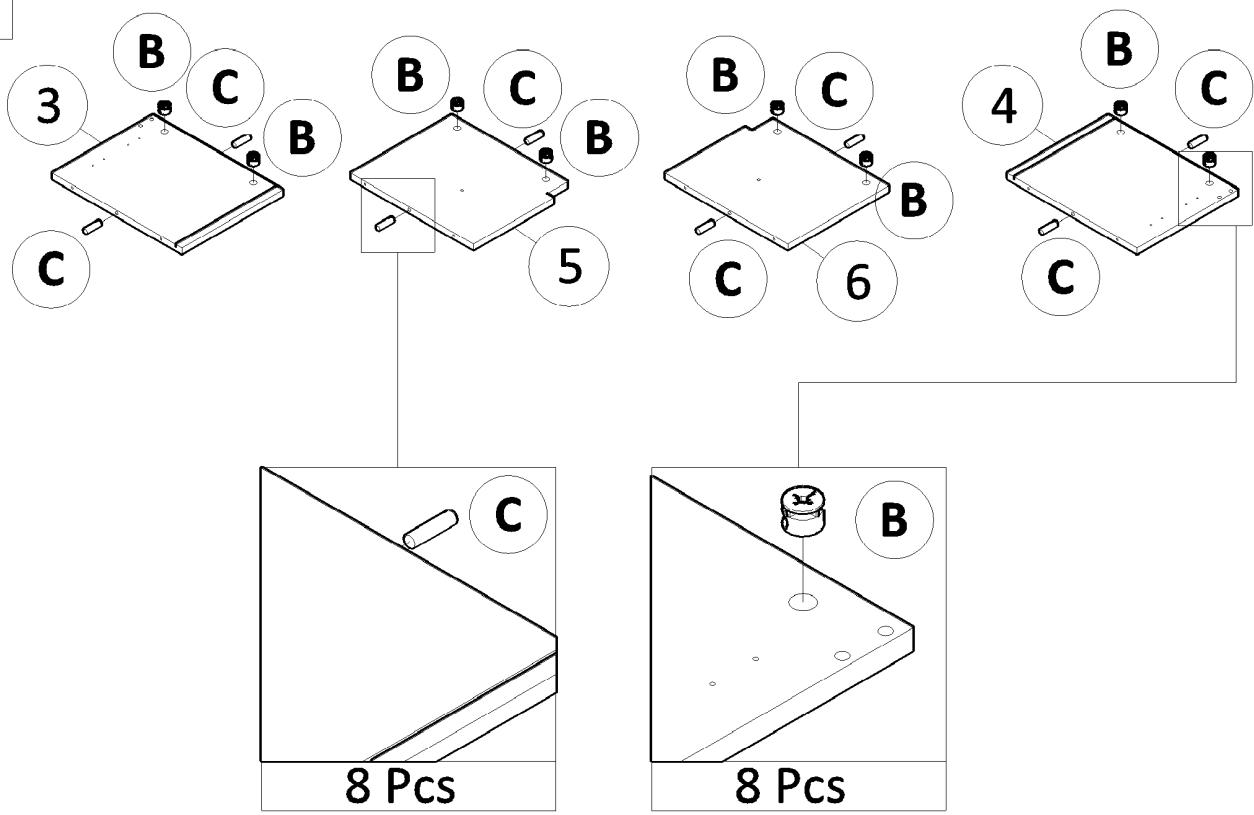

Failure to follow these directions could cause poor strength or stability.

Insert screws loose to line up with slots then tighten up each screw.

3

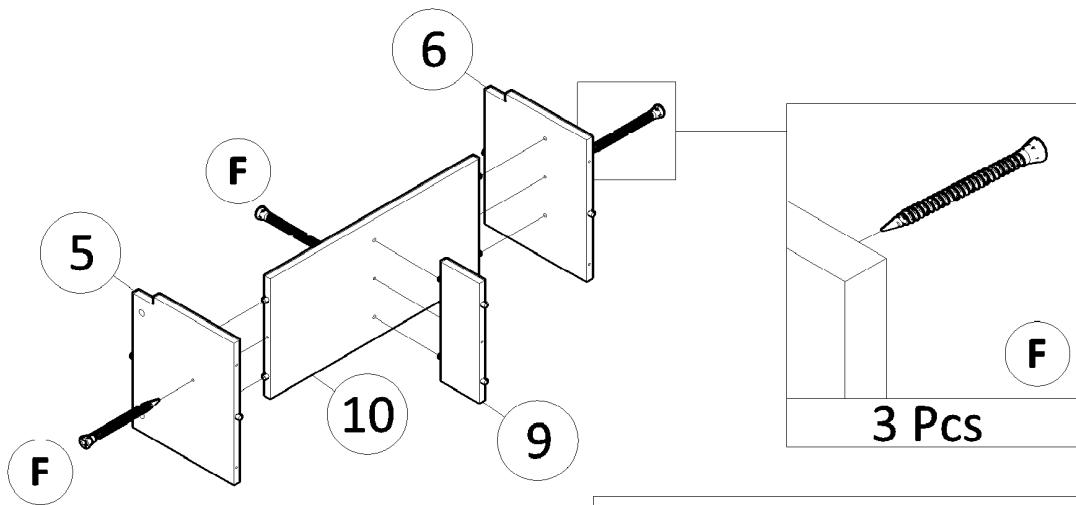

4

Assembly Step (Continue)

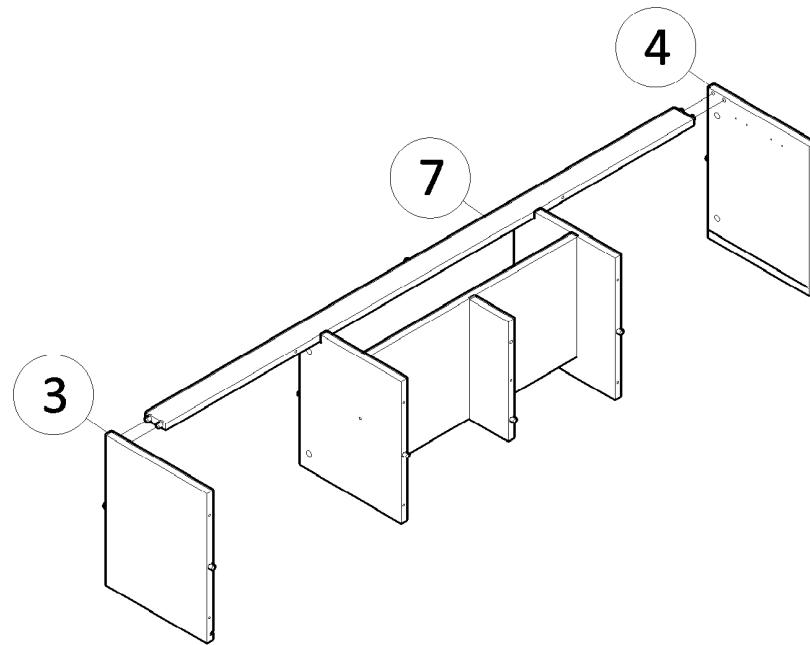

5

Installation:

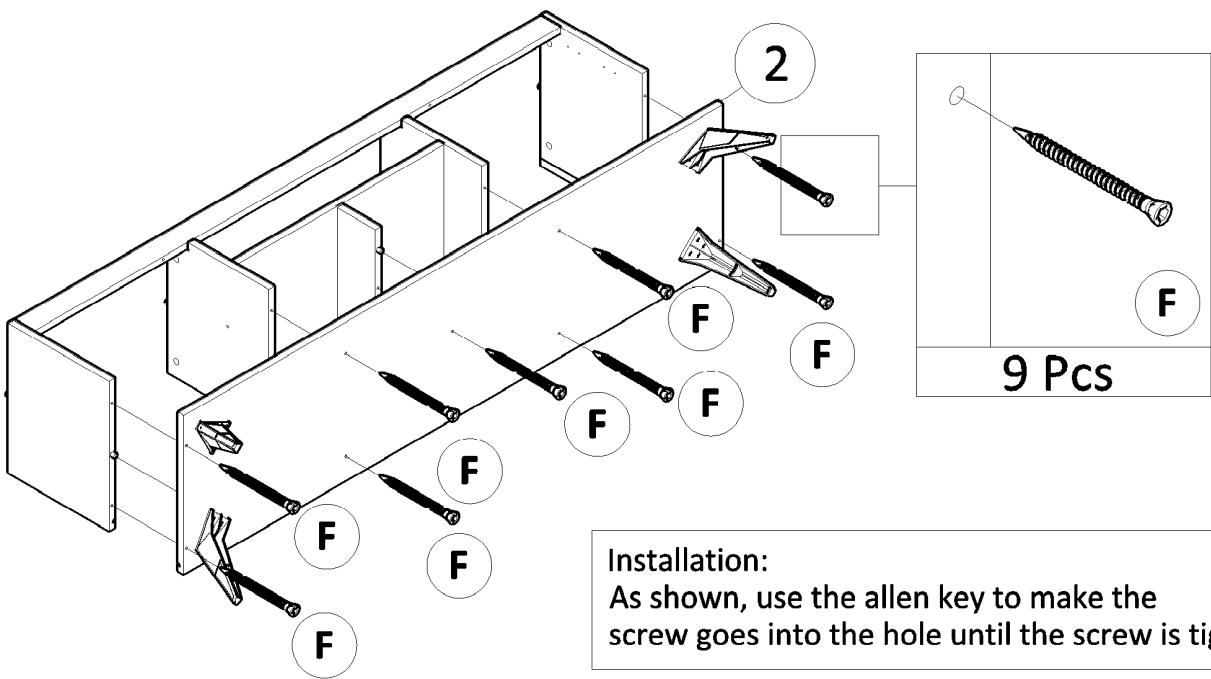

As shown, use the allen key to make the screw goes into the hole until the screw is tight.

6

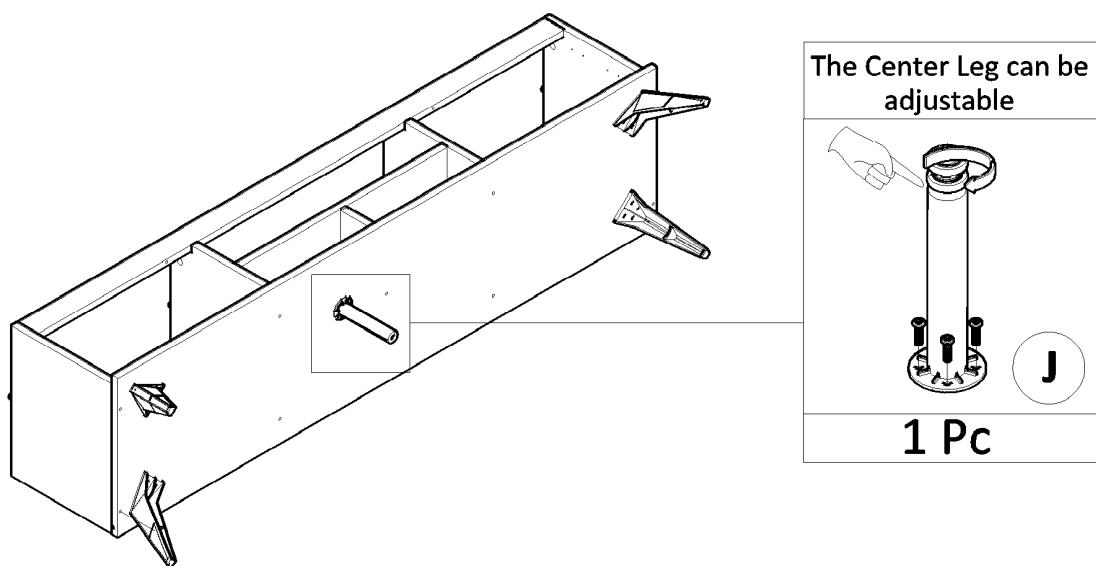

Assembly Step (Continue)

7

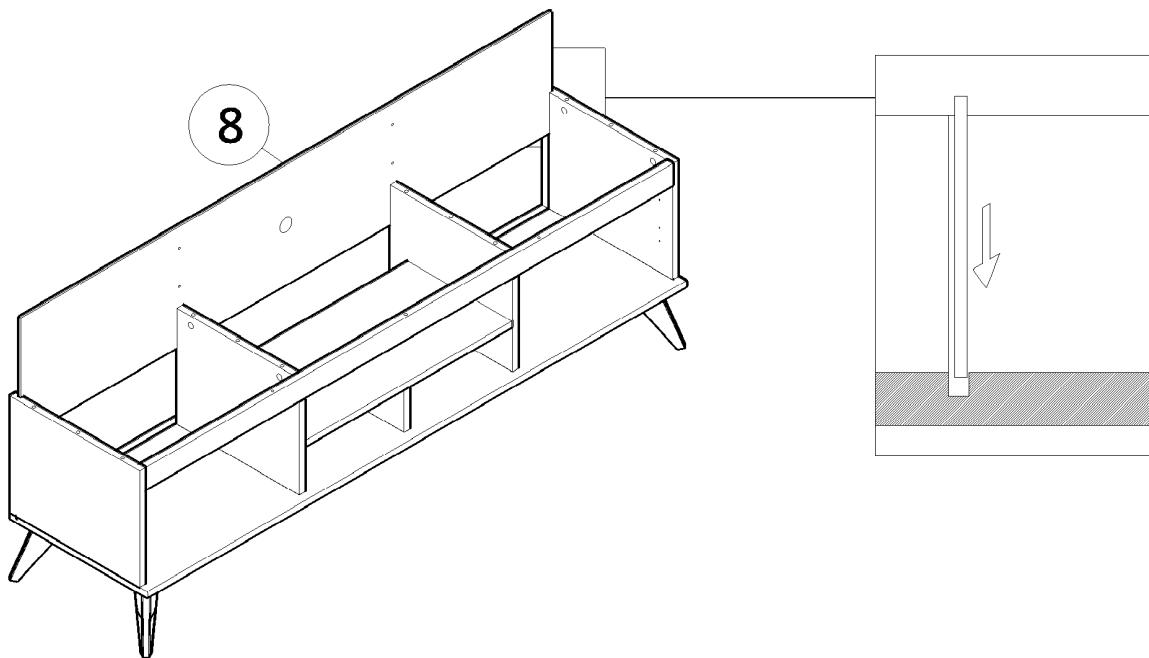

8

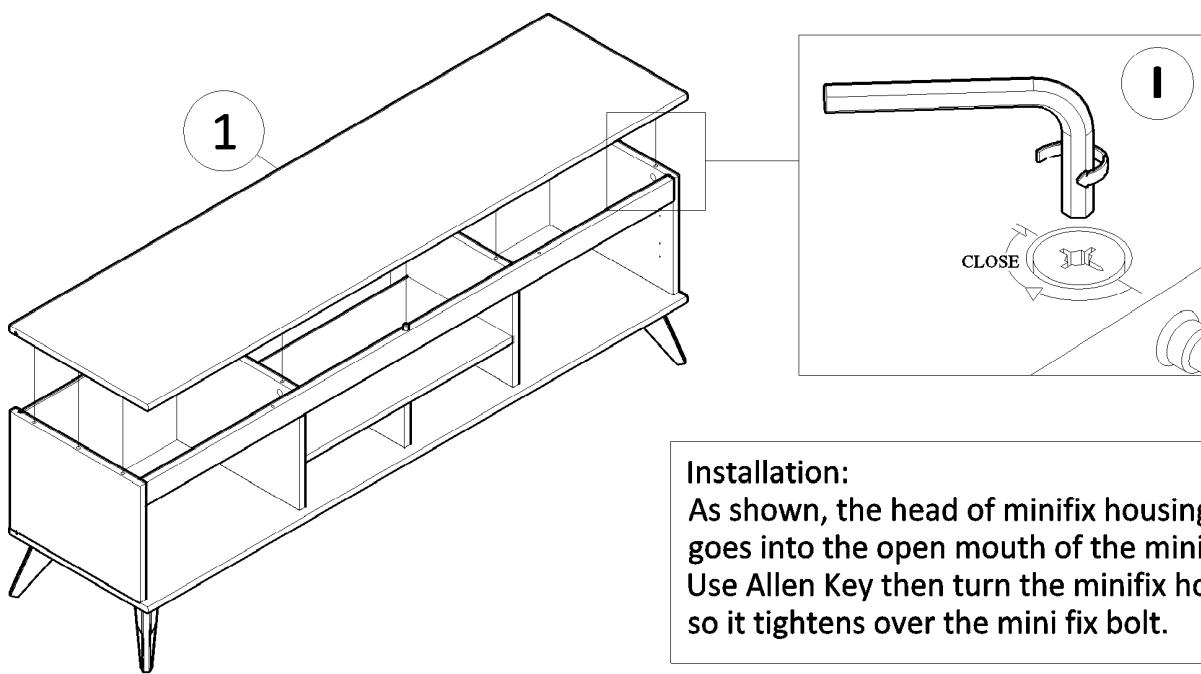

Assembly Step (Continue)

9

10

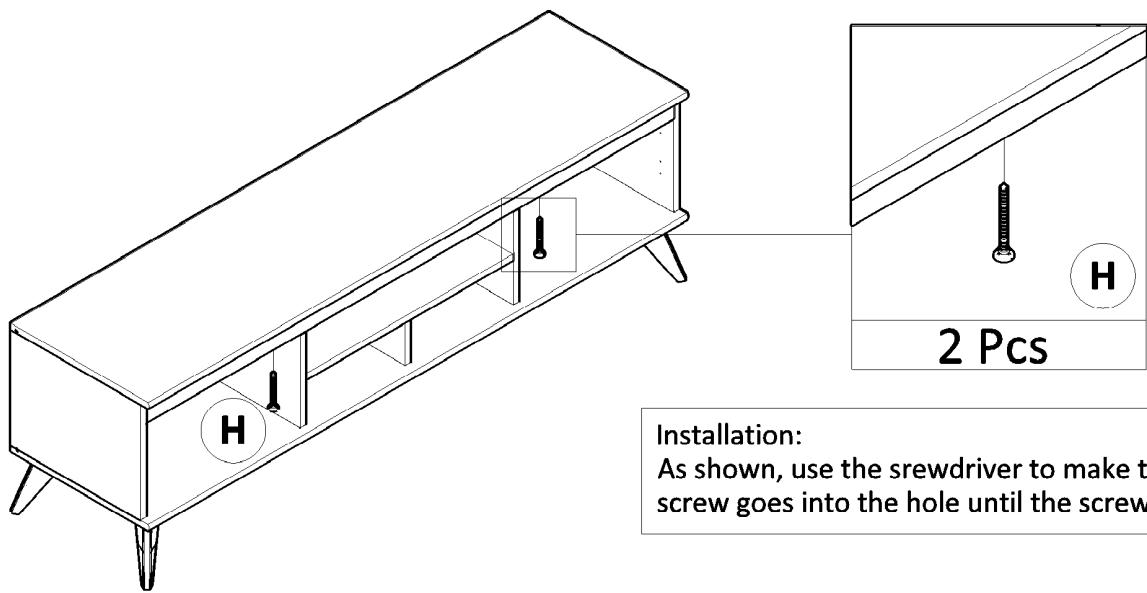

Installation:

As shown, the head of minifix housing goes into the open mouth of the mini fix bolt. Use Allen Key then turn the minifix housing so it tightens over the mini fix bolt.

Assembly Step (Continue)

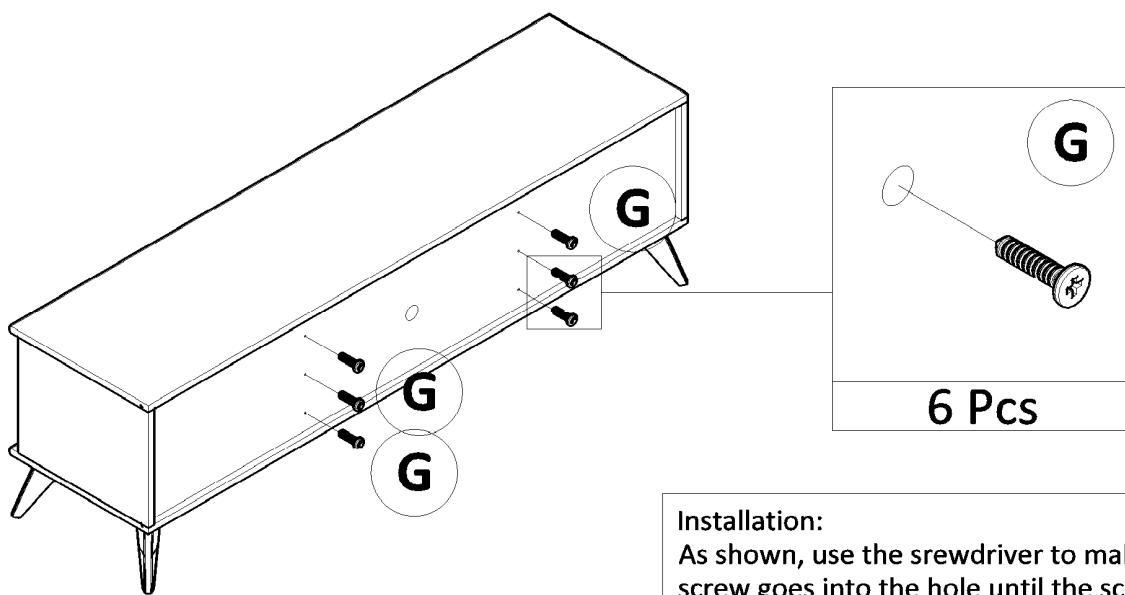

11

Installation:

As shown, use the screwdriver to make the screw goes into the hole until the screw is tight.

12

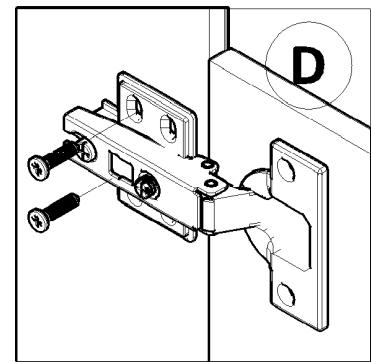

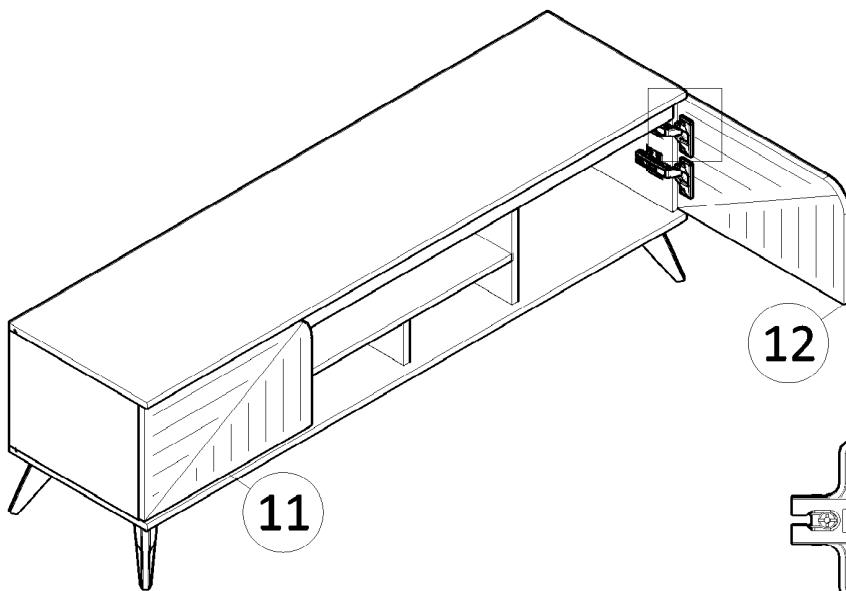

Installation:

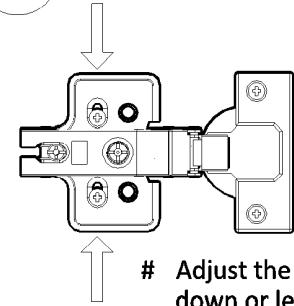

As shown, use the screwdriver to make the screw goes into the hole until the screw is tight.

Assembly Step (Continue)

13

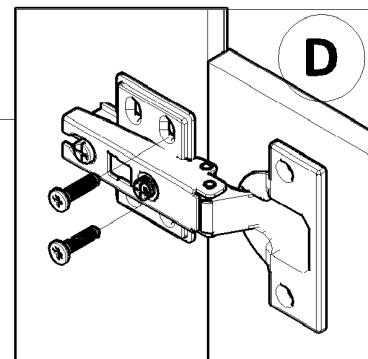

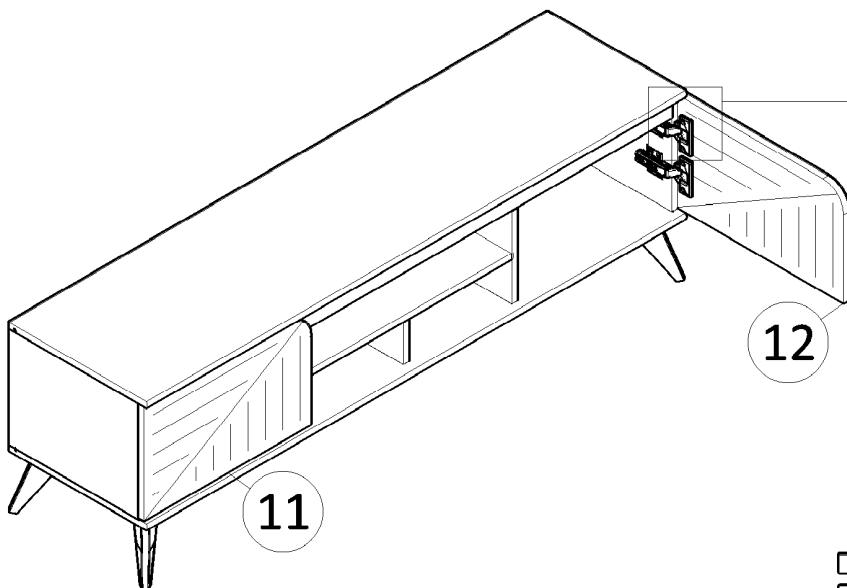

12

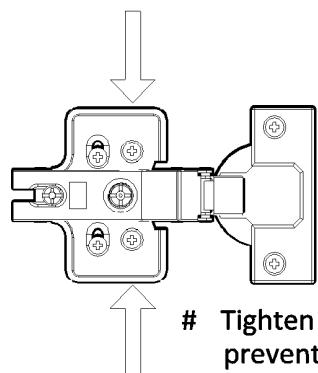

Adjust the door by moving it up and down or left and right then tighten the screws.

14

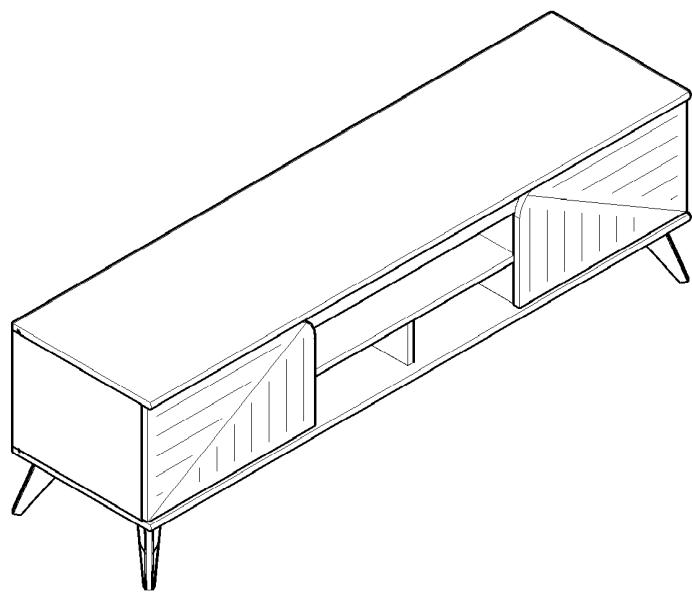

12

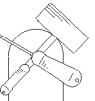

Tighten the screws to prevent sliding doors.

Assembly Step (Continue)

15 COMPLETED

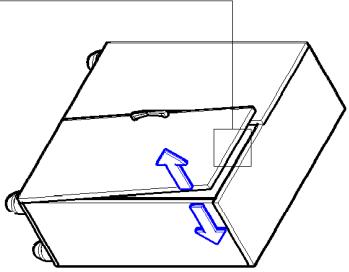

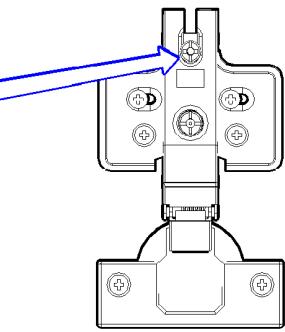

HOW TO ADJUST GLASS/DOORS

● There is a gap between the door and the shelf with doors closed

Loosen the back adjustable screw which is one of the two screws looking from the front while supporting the doors, adjust the door by moving it back and forth, then tighten the back screw.

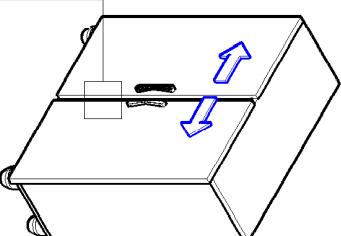

If there is a gap between the doors on the top.

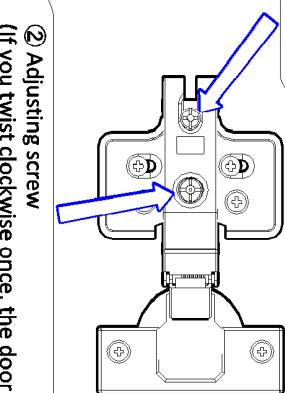

Loosen this screw, adjust by moving back and forth

● There is a gap in the middle with doors closed

Loosen the ① back adjustable screw which is one of the two screws looking from the front while supporting the doors, tighten the ② screw clockwise, then adjust the middle gap. After adjusted, tighten the ① screw.

If the gap is wide

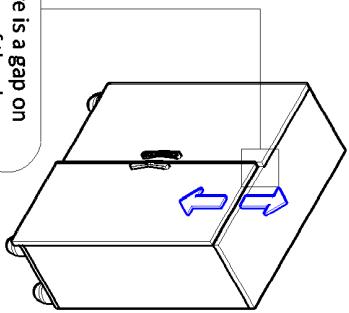

① Fixing screw
② Adjusting screw
(If you twist clockwise once, the door moves about 2mm inward)

● There is a gap on the top of the door when doors are closed

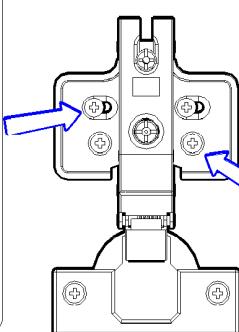

(Glass slide hinge does not require this step)
(4 screw hole hinge does not require ①)

Loosen the slide hinge screw while supporting the door, adjust the door by moving it up and down then tighten the screws.

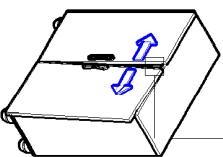

(Please loosen the slide hinge screws of the door completely you are adjusting before moving it up and down.)

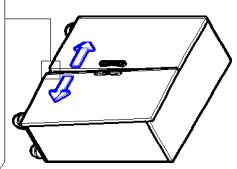

If there is a gap on the top of the door

① Open screw

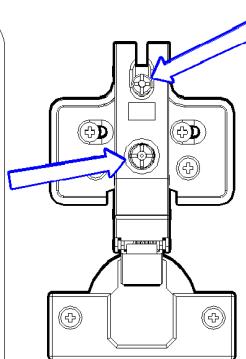

If there is a gap between the doors on the top
(Please adjust slide hinge
the top part door)

① Fixing screw

If there is a gap between the doors on the bottom
(Please adjust slide hinge
the bottom part door)

② Adjusting screw
(If you twist clockwise once, the door moves about 2mm inward)
