

Outdoor furniture maintenance guide

Spending time outdoors? Daydream, chit-chat, catnap and savor delicious flavors. You don't worry about the quality of your outdoor furniture, because we've done all the thinking and researching for you. From choosing durable materials to adding extra protection against the elements. Just enjoy!

Good to know: Pre-treated with hardwax oil. It is not necessary to apply any other treatment until the surface begins to wear. Excessive oil can easily be wiped off with dry cloth before use.

Acacia, eucalyptus and other solid woods usually require a little care from time to time. Clean with a mild soapy solution, cover when not in use. All our wooden outdoor furniture is pre-treated with stain or paint. We recommend re-staining to prevent cracking and extend its lifetime. How often you re-stain depends on location, usage and exposure to the elements. For example, furniture in open air needs re-staining when rain drops are absorbed instead of forming small beads. If painted furniture begins to flake or look worn, repaint or touch up with paint for outdoor use.
