Installation

Power Method 1: Plug in		Power Method 2: Hardwire	
Step 1		Step 2	
<p>Measure the distance between the two ends, this mirror can be hung horizontal or vertical. Using a pencil and a level, mark the desired position on the wall.</p>		<p>Drill the holes for nails and screws.</p>	
Step 3		Step 4	
<p>Insert the nails.</p>		<p>Mounted the brackets on the wall and then light the screws to ensure the bracket stay sturdy. (Leave a 2-3 mm gap between the screwhead and wall)</p>	
Step 5		Step 6	

Warm Tips:

- 1. Please check the mirrors firstly after you receive it and make sure the led mirror is intact and no damage. The accessories are hanging behind the mirror, please recheck the packing box if you did not find it.
- 2. Please power the mirror with plug to test the mirror and each functions before installation. If it can not be powered, please open the cover of the power supply on the back of the mirror to test the power cables, tighten the cables if they are loose. (Please cut off the power firstly before testing the power supply and cables)
- 3. For any questions or problems, please feel free to contact us.

Maintenance:

- 1. Do not touch the mirror with wet hands, and do not wipe the mirror with wet cloth to avoid increasing moisture intrusion.
- 2. It is recommended to wipe the mirror with a soft cloth or gauze.
- 3. Do not use any chemicals or misuse cleaning agents.
