2) Step by Step Instructions

★PS: Best to use electric screw driver supplied by consumer.

STEP 1

Place the two side frames, wood top and wood base on a flat level surface.

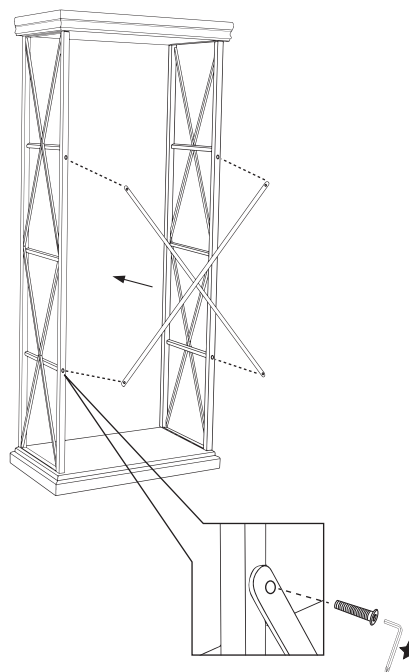

STEP 2

Using bolts assemble the top to the side frame. Using the washers and hex nuts assemble the wood base to the side frame sections.
Note: Be sure to have the side frame facing in the same direction so that you are able to attach the support rail. Do not tighten connections firmly yet.

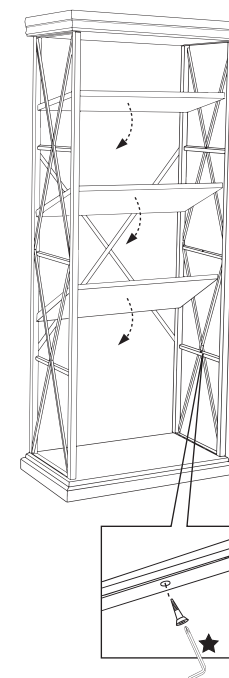

STEP 3

Using the allen key and bolts attach the X shaped support rail. Do not fully tighten yet.

STEP 4

Attach each shelf to the side frame using the screws and your screwdriver. Start with the center shelf then attach the top shelf and finally the bottom shelf.

COMPLETION

Firmly tighten all screws and hex nuts from each of the prior steps.
