

Assembly Instructions for Bar Table

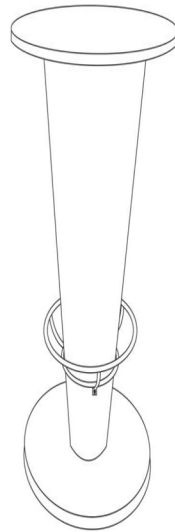

In the two separate boxes that you have received you will find the parts of the bar table as seen above.

STEP – 1 - Unscrew the two round pieces (Top & Base) by holding one and rotating the other in a counter clock wise direction until they separate. Now you will have 3 parts. 1- Larger Round Top, 2- the Centre Pedestal and 3 - the Smaller Round Part which is the base. No tools are needed for assembly.

STEP-2 Place part 3 which is the round base (the smaller round piece) on the floor with the bolt facing up and screw the centre pedestal by rotating it clockwise as seen in the above diagram.

STEP-3 Align the bottom of the table top with the bolt on the top of the centre pedestal and screw it clockwise in the same manner. Tightened it and now your table is ready for use. There are levelers on the bottom of the round base plate which may be used to level the table if needed.
