

Product Name:	6Ft Pre-Lit Snow Flocked Pop-Up Artificial Christmas Tree
SKU #:	WHAP2100

Thank you for purchasing this LuxenHöme product. This product has been manufactured with the highest standards of safety and quality.

PLEASE READ ALL INSTRUCTIONS BEFORE ASSEMBLY.

Unpack all parts from inside the carton to ensure there are no missing or damaged parts. If any parts are missing or damaged, do not attempt to assemble or use the product.

CARTON CONTENTS:

Description	Quantity
Metal stand	1
Metal screws	3
Tree section	2
Metal tube	3
Transformer	1

Before You Start

1. Position on an appropriate location for your product, please read Assembly and Instruction procedure carefully.

Note: These trees are for indoor displays only!

2. Retain the instructions for future use and save the carton for storing your tree.

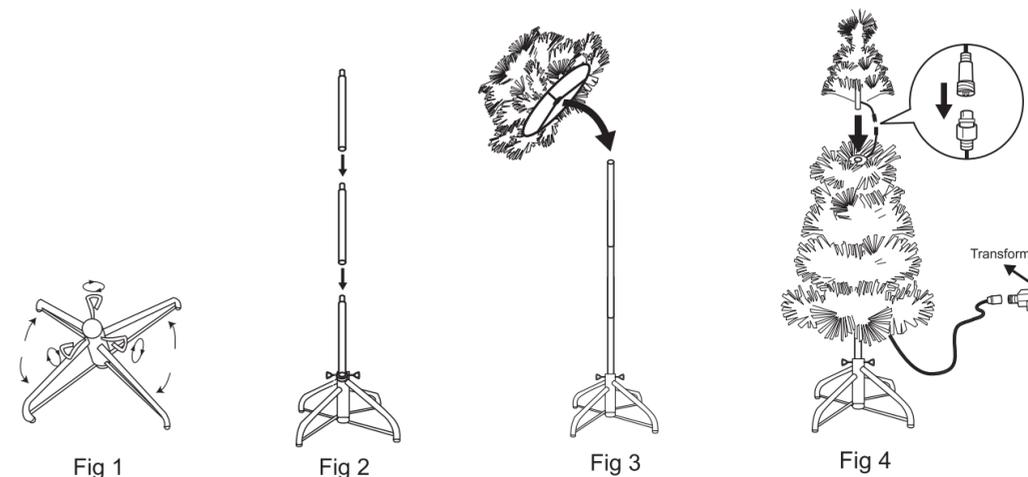

Assembly and Instruction Procedure (no tools required for assembly):

Remove all packaging (i.e.: cardboard or plastic) before beginning. We suggest unpacking the trees on a large cloth. Some of the snow flocking may come off during unpacking and fluffing of branches.

After unpacking the product, locate the metal stand and unfold the legs. Position the lower stem of the tree and inert this into the metal stand, **make sure the stem is centered**, then tightening the grip through the base with the metal screws included, as shown in Fig 1 below.

- Locate the top and middle connectable trunk frame tubes and join these together, as shown in Fig 2 below, making one main trunk frame.
- Locate the lower section of the collapsed tree and carefully fit this over the top of the trunk frame - ensuring that the top of the frame fits over and within the inner central rim of the collapsed tree, as shown in Fig 3.
- Carefully let the actual tree drop towards the ground, around the inner trunk frame, then locate the top section of the tree and connect this to the hole on the upper end of the already assembled lower section, as shown in Fig 4.
- Please ensure that the two sections of light chain are correctly and securely connected together, as shown in Fig 4.
- With the tree assembled and in your desired location, it is now recommended that you arrange the branches to your preferred display. This process is known as "Fluffing". We suggest fluffing all branches from the spiral sections - some up, some down and some remain central - this will then create the fullness effect of the tree concealing unnecessary space gaps within the Pop-Up / Collapsible construction. The top section of the tree can then be arranged in similar fashion making the perfect artificial Christmas tree.
- This product is intended for use as a Christmas decoration only, it is not intended for household room illumination.

Product Name:	6Ft Pre-Lit Snow Flocked Pop-Up Artificial Christmas Tree
SKU #:	WHAP2100

This pre-lit tree is for INDOOR use ONLY. The tree stand must be placed on a flat rigid surface.
