KITCHEN FAUCET

BEFORE YOU BEGIN YOUR INSTALLATION

Shut off water supply

Flush hot and cold water supply lines

Required tools

Installation by License Professional Plumber

Flush the water pipe before installation

Drawings are for reference only

Do not disassemble the body

FAUCET INSTALLATION

Ensure there is a Ø35mm through-hole on the kitchen counter. Remove the mounting nut (A) and washer (B) from the threaded shroud (C).

Connect braided supply hoses to faucet female outlets, secure firmly by hand until hose is snug to pipe.

Position faucet on the installation surface. Fit flexible hoses through hole on countertop or sink.

Slide washer and thread the mounting nut onto threaded shroud. Turn faucet to desired handle position. Securely tighten clamp screws (E).

Connect pullout hose to quick connect and insert weight (loose-install).

Secure weight on lowest vertical point on pull-out hose side. (not on quick connect side).

Before connecting supply hose, flush supply valves to clear any debris. Place a bucket underneath valves and run water for 5 to 10 seconds. Turn water off.

Connect hot and cold water lines to the inlet pipe and tighten with a wrench until snug. Do not over tight.

Unscrew spray head by hand. Hold the tip of the spray hose down and turn on the faucet and let the water run 60 seconds to flush any debris, then re-connect spray head. Ensure gasket is present.

CARE AND CLEANING

Clean the faucet frequently using mild soap or an on-abrasive cleaner and then quickly rinse with water and dry with soft cloth only.

Using abrasive cleaners, solvents, acid cleaners or any scrubbing detergent, polisher or scraper will damage the finish and void the warranty.

WARRANTY

For additional technical assistance or for any questions or concerns about your kitchen faucet's warranty, please contact us.

ROBINET DE CUISINE

AVANT DE COMMENCER VOTRE INSTALLATION

Coupez l'alimentation en eau

Videz les conduites d'eau chaude et froide

Outils nécessaires

Installation par un plombier professionnel accrédité

Videz la conduite d'eau avant l'installation

Les illustrations ne sont données qu'à titre indicatif

Ne pas démonter le boîtier

INSTALLATION DU ROBINET

ENTRETIEN ET NETTOYAGE

Nettoyez fréquemment le robinet à l'aide d'un savon doux ou d'un nettoyant non abrasif, puis rincez-le rapidement à l'eau et séchez-le avec un chiffon doux.

L'utilisation de nettoyants abrasifs, de solvants, de nettoyants acides ou de tout autre détergent à récurer, polisseur ou grattoir endommagera la finition et annulera la garantie.

GARANTIE
