Chandelier Installation and Safety Standards

The installation of a chandelier is a crucial step in ensuring its safety. Chandelier safety standards dictate the process of installation, including the tools and equipment that can be used, the methods of securing the chandelier, and the location of the chandelier.

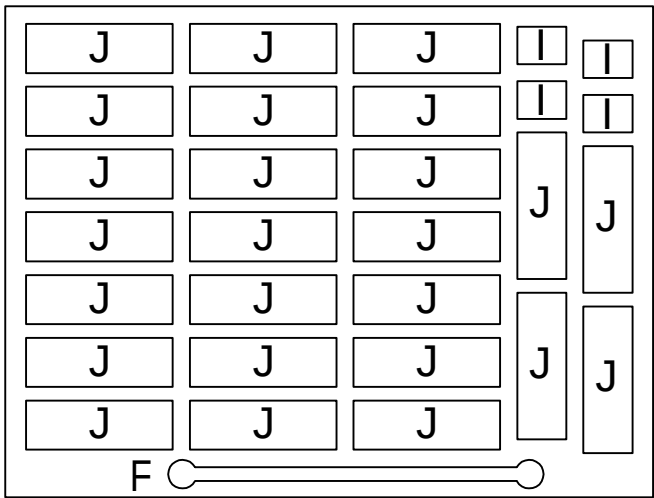

Securing the chandelier is a crucial step in the installation process. Chandelier safety standards dictate that the chandelier must be securely attached to a suitable support, such as a ceiling joist, to prevent it from falling. This includes ensuring that the support is strong enough to bear the weight of the chandelier, and that the chandelier is properly balanced to prevent it from tipping or swaying.

Furthermore, the chandelier must be secured using suitable hardware, such as screws or bolts, that are strong enough to bear its weight. The hardware must be properly installed and tightened to ensure that the chandelier is securely attached. Regular inspections of the hardware are also necessary to detect and repair any damage or wear promptly.

F.Pull Rod Round Tube-5pcs

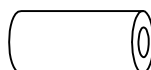

G.Chain-1+1+1pcs

H.Locking Clips-20+1pcs

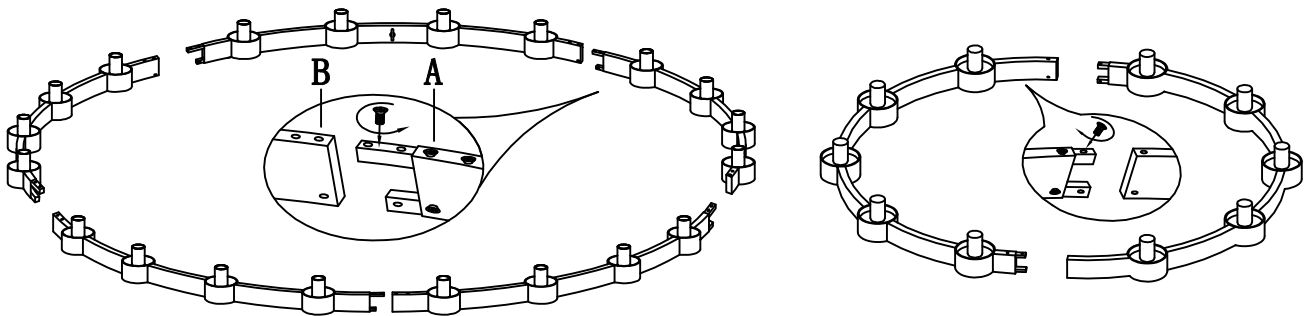

I.Glass Lampshade-30+1pcs

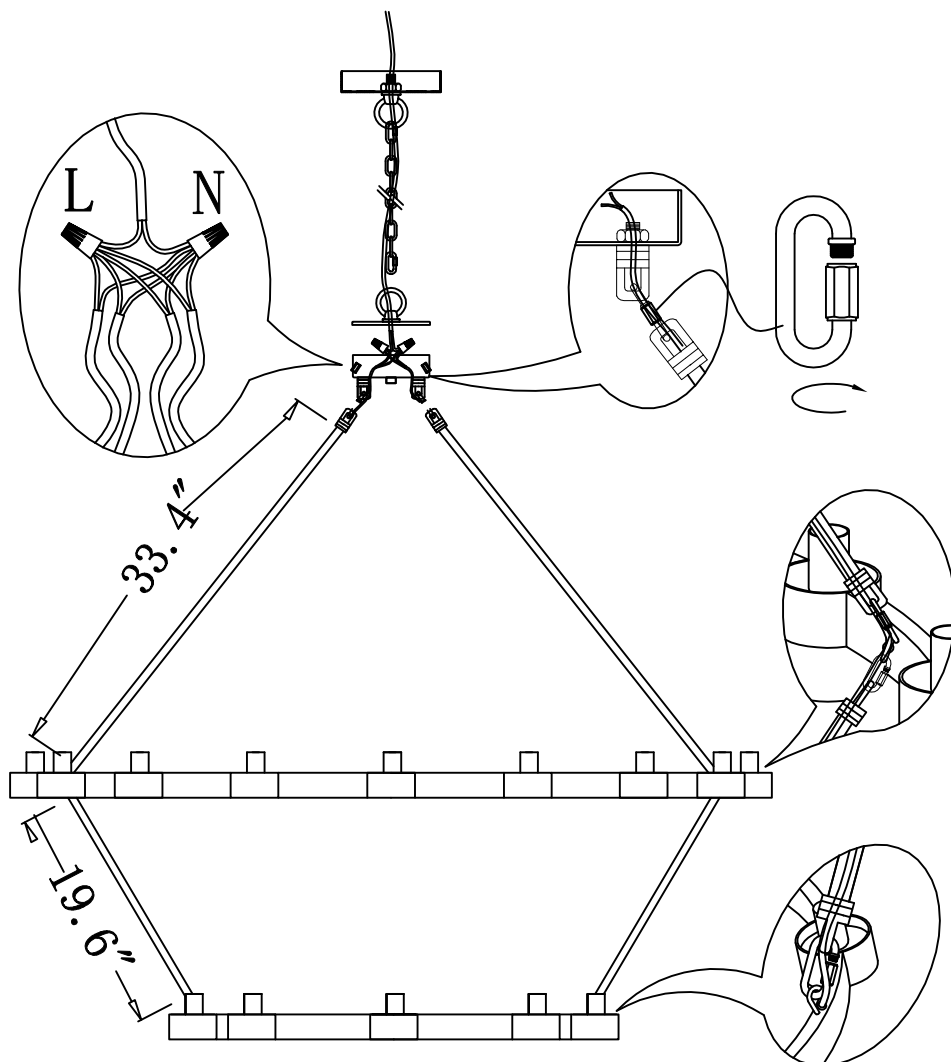

J.Glass Lampshade-30+2pcs

① Fixture Assembly:

- (1), Find the lamp body from the sorting list.
- (2), Assemble parts A and B of the lamp body according to the diagram, and connect the assembly plug.
- (3), Take the pull rod round tube and connect parts A and B of the lamp body (as shown below).
- (4), Thread the power cable through the round tube, use locking clamps to connect the lamp body and the round tube, and insert the power cable into the top of the lamp body to connect it to the main power cable inside the lamp.
- (5), Connect the power cable inside the lamp body to the main power cable, and pass the lamp's main cable through the hanging chain into the canopy.

If the circular hole position of the screw installation cannot be aligned with accessory B, please loosen the screw of model A, insert the accessory of model B again and align the circular hole position. then tighten the screw.

② Light Source and Lampshade Assembly:

- (1), Take the mounting plate and attach it to the ceiling.
- (2), Connect the main power line with the lamp body's power line and secure the ceiling plate.
- (3), Screw the 24 E12 bulbs into the lamp sockets (bulbs not included in the product).
- (4), Install the long and short glass lampshades into the lamp body in sequence.
- (5), Assembly complete.
