ASSEMBLY INSTRUCTIONS

Wall Mounting and Fixing

EXPANSION WALL ANCHOR

Our provided expansion wall anchors are only suitable for masonry walls, such as drywall, plaster or concrete, and are best for holding lightweight items or for anti-tip prevention. If you are unsure of the correct wall anchor to use with the product, please request professional guidance. Liability for product damage or failure due to using the incorrect anchors will fall on the installer.

CHECK BEFORE PROCEEDING

Prior to drilling or hammering, please check for wires or pipes. We recommend using a stud finder to locate a stud, which will offer more appropriate resistance and hold more weight.

QUICK TIPS

1. If unsure of the proper size, always choose a larger screw and wall anchor.

2. Match the drill bit to the wall anchor and hole size.

3. Only drill horizontally. Do not force the drill or enlarge the hole for the wall anchor.

4. Take extra care when drilling into high walls or ceramic tiles. Wall anchors should be a tight fit for the hole. Never use wall anchors in ceilings.

MAINTENANCE

Yearly
Check

We recommend a yearly check to see if the wall anchor or screw has loosened. If so, please remove the existing wall anchor and screw, and use a new anchor.
