Hook

ASSEMBLY INSTRUCTIONS

step1

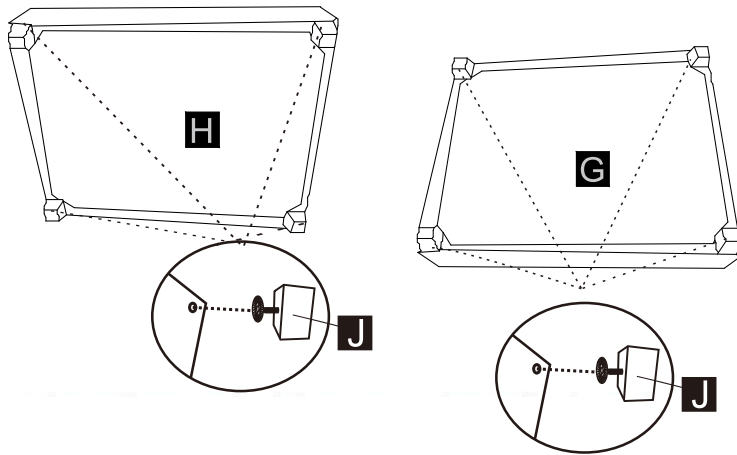

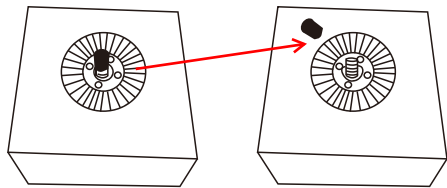

Take the cushion out of the compression bag and allow it to recover for a period of time, it takes about 24 hours for the cushion to fully recover, and you can slap the cushion to speed up the recovery.

Be sure to check all packing material fitting the packing list. Be careful for small parts, which may have come loose inside the carton during shipment.

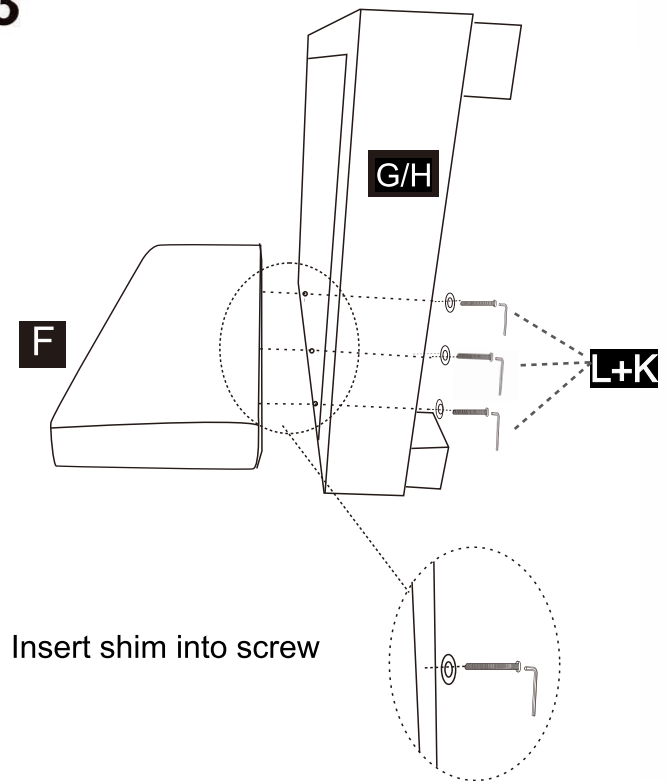

step2

Remove the plastic cover from the sofa leg screw

Place the bottom of the sofa frame upward on a clean place, align the screw of the wooden foot with the screw hole reserved at the bottom of the sofa and rotate clock wise to install the wooden foot firmly.

step3

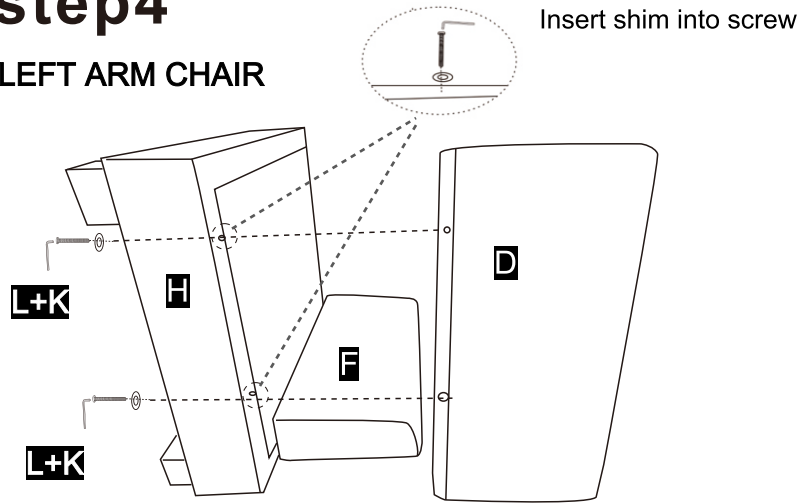

Insert shim into screw

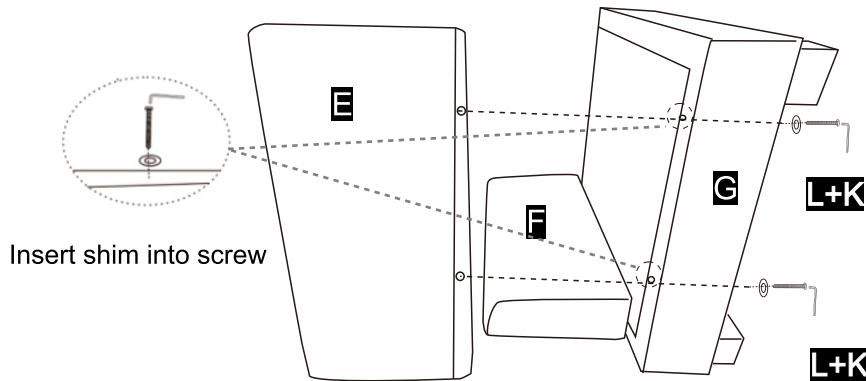

Place the seat frame on the side on a clean plane, make the side with 3 holes of the seat frame is close to the backrest, make the assembly holes of the seat frame are aligned with the assembly holes of the backrest (when the backrest and the seat frame are aligned on both sides, the assembly holes of the seat frame and the backrest are aligned), and use a screw to tighten the assembly of the backrest and the seat frame. (Screw each screw to 50% first, and when all 3 screws are screwed on, use the Allen key to completely tighten all screws.)

step4

LEFT ARM CHAIR

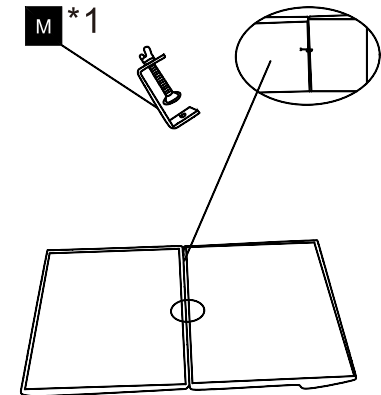

RIGHT ARM CHAIR

Turn the seat frame with the backrest in a different direction, turn the backrest down, pick up the armrest frame, align the hooks on the backrest frame to connect them, and align the 2 screw holes on the seat frame at the same time, then tighten them to completely fix.

step5

ARM CHAIR L+R

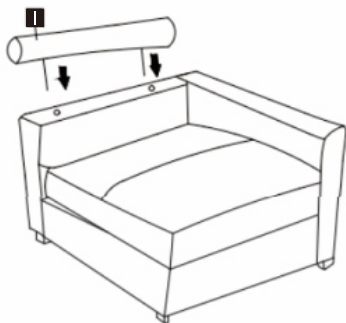

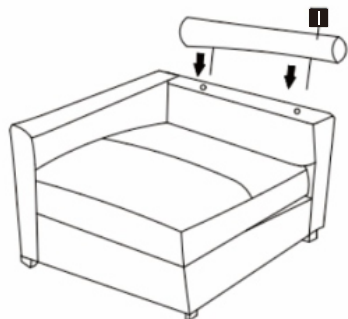

One hook in each seat spare parts bag

There are two metal hooks connectors inside the carton of the left and right unilateral sofa, and if you are using a unilateral sofa, this hook is not useful. If you need to use the left and right unilateral sofa together, please place the bottom of the left and right sofa upward on a clean plane before the rod pillow at the top of the back is inserted, align the left and right unilateral sofa before and after and try to keep it close, use the metal hook in the packing box, seize the combined sofa 20 cm away from the front and back of the sofa, and then tighten the screw. Turn the assembled sofa tightly together, face up, and insert the cylindrical pillow.

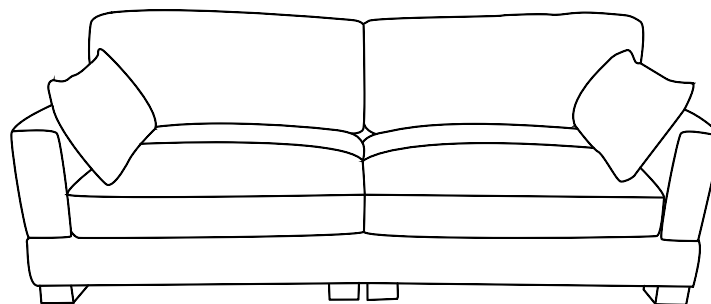

Since there is a sponge on the outside of the wooden frame of the sofa, the two parts need to be squeezed tightly when fixed with the buckle.

step 6

The headrest has three heights to adjust, and the height of the headrest can be adjusted according to your needs. Lift or press the headrest into the desired gear. If the metal dowel brings out the plastic core in the hole during the adjustment process, this is because the metal cover above the assembly hole is not tightened, you only need to remove the plastic part from the metal dowel, insert the small head downward into the hole, and then tighten the metal cover.

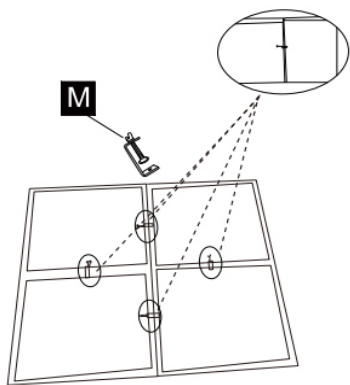

step 7

Clean the excessive thread ends on the sofa frame. Tidy up the cushion/pillow/armrest of the sofa to make it beautiful and the assembly is completed.

step 8

ARM CHAIR+OTTOMAN COMBINATION

If the armchair needs to be combined with the ottoman, you can use the hook provided in the package to fix it at the bottom of the sofa as shown in the figure to prevent displacement.
