EXPLODED PARTS

**Step 1** Loosing the nuts then put the tube into the lamp body fixed the nuts again. If the wire is too long then making it hard to put in the tube, you can open the bottom cap, to fix the wire then install the tube again.

**2.** Put the wire into the L600 tube(3), then put the tube into the fixture. Meanwhile, install the L600 tube into the canopy.

**Mounting Screws**

**STEP 3** Put the mounting unit into the junction box, fixed it with the mounting screws.

**STEP 4**

Make the electrical connection from the junction box to the fixture  
Connect the ground wire to the mounting unit using the preinstalled green ground screws  
Then, connect the positive, negative and ground wires with the supplied wire nuts, and secure with electrical tape.

**STEP 5** Install the fixture to the junction with the screws

**STEP 6** Install the light bulb then put the glass shade into the socket and using the hand to adjust the spring plates.

**STEP 7** Finish the installation.
