Chandelier Installation and Safety Standards

The installation of a chandelier is a crucial step in ensuring its safety. chandelier safety standards dict theprocess of installation, including the tools and equipment that can be used, the methods of securing thechandelier, and the location of the chandelier

Securing the chandelier is a crucial step in the installation process. Chandelier safety standards dictate that thechandelier must be securely attached to a suitable support, such as a ceiling joist, to prevent it from falling. Thisincludes ensuring that the support is strong enough to bear the weight of the chandelier, and that the chandelieris properly balanced to prevent it from tipping or swaying

Furthermore, the chandelier must be secured using suitable hardware,,such as screws or bolts, that are strongenough to bear its weight. The hardware must be properly installed and tightened to ensure that the chandelier issecurely attached. Regular inspections of the hardware are also necessary to detect and repair any damage orwear promptly.

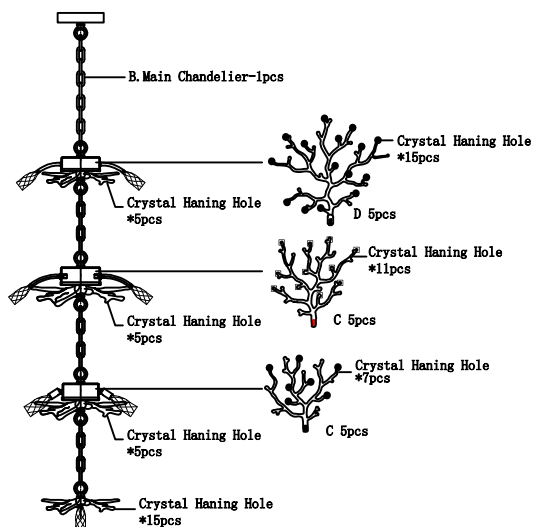

Accessory List

3+2pcs

42+10pcs

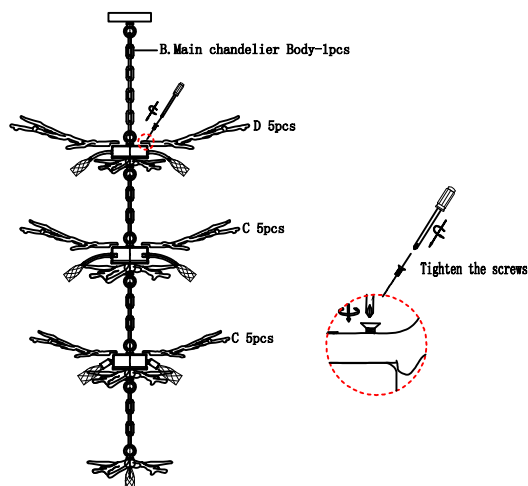

A 195+5pcs

①Step:

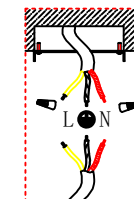

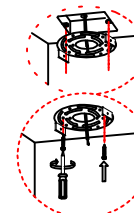

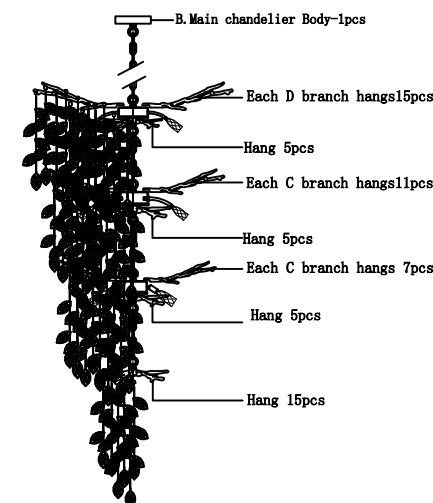

- (1),Locate fixture body A from the list.
- (2) Assemble fixture body A with branches (B, C, D,) according to the diagram, aligning the holes and tightening the screws.

(As shown in the diagram below)

②Step:

- (1)Take out the mounting plate and attach it to the wall.
- (2)Connect the main power line to the fixtures main line, and secure the ceiling plate.
- (3)Properly connect the driver power wires.
- (4)Insert 25 G9 light sources into the lamp holder (not included in the product).
- (5)Hang the crystals (a total of 195 strings, of which 5 strings are spares and do not need to be hung). Installation completed.
