Safety first, fun later

Safe use of this product starts with you.

Use this light fixture responsibly with the primary concern for your safety. Follow assembly instructions carefully and inspect product upon receipt and each use.

Nathan James and its parent companies cannot be held legally responsible for any injuries or death resulted from failure to follow instructions or improper use of this product.

Do not modify the structure of this product in any way.

Our products have been tested to meet specific safety measures as they were originally intended to be sold. Any modifications will present the risk of creating significant safety issues which Nathan James will not be responsible for.

Proper use

- DO NOT** use for commercial purposes
- DO NOT** leave spilled liquid on fixture
- DO NOT** use light fixture if damaged
- DO NOT** make temporary repairs
- DO NOT** use outdoors

WARNING

Inspect the wire insulation for any cuts, abrasions, or exposed copper that may have occurred during shipping. If there is a defect in the wire, do not attempt installation. Please reach out to our Customer Happiness team at help@nathanjames.com or 1-866-619-1004

WARNING: RISK OF ELECTRIC SHOCK

Before starting the installation, disconnect the power by turning off the circuit breaker or by removing the appropriate fuse at the fuse box. Turning the power off at the switch is NOT SUFFICIENT to prevent electrical shock. PLEASE CONSULT A QUALIFIED ELECTRICIAN IF YOU HAVE ANY ELECTRICAL QUESTIONS.

IMPORTANT

1. Do not tighten bolts / screws completely until all bolts / screws are lined up and inserted into holes.
2. Do not over tighten screws and bolts to avoid stripping.
3. Please use hand tools to assemble this product.

Pre-Installation

- Read all instructions prior to beginning assembly.
- To avoid damaging this product, assemble it on a soft, non-abrasive surface such as carpet or cardboard.
- Keep the receipt and these instructions for proof of purchase.
- Suggested Bulb: B10 or B11 LED 40 Watt Equivalent | E12 Medium Base | Dimmable
- Fixture Max Wattage: 80W

Step 1

It's as easy as it looks! Remove Fixture Mounting Screws (4) to separate the Mounting Bracket (1) from the Fixture Assembly (A).

Step 2

Install the Mounting Bracket (1) to your pre-existing Electrical Box, using the Mounting Bracket Screws (2).

Note: Be sure that you are only making the connections to a 120V AC 60Hz circuit. If you do not have a pre-existing electrical box, we strongly advise using a certified electrician.

Step 3

Ground Wire from the Fixture Assembly (A) is to be wrapped around the grounding screw on the Mounting Bracket.

P.S. We aren't judging you if you've already pulled out your snack. Ours was eaten by Step 2.

Step 4

Join matching colored wires with Wire Connectors (3).

Begin tucking the excess wire into the electrical box.

Step 5

Using the Fixture Mounting Screws (4), mount the Fixture Assembly (A) to the Mounting Bracket (1).

Be sure that you have all of the excess wire tucked into the Electrical Box.

Step 6

Remove the shade collars from the Fixture Assembly (A) by unscrewing them.

Step 7

Secure the Shade (B) by twisting the shade collars back into place, sandwiching the shade between the shade collars and the Fixture Assembly (A).

Step 8

Last but not least, we need to add the bulb! Insert the bulb of your choice and let there be light!

Bulb (not included)

We recommend using 2 Type B10 or B11 light bulb.
120V 60Hz AC only.

Troubleshooting

Problem	Possible Causes	Solutions
The bulb will not light.	The bulb is burned out.	Replace the light bulb.
	The power is off.	Ensure the power supply is on.
	The circuit breaker is off.	Ensure the circuit breaker is in the ON position.
The fuse blows or circuit breaker blows when the light is turned on.	There is an exposed wire.	Discontinue use of the light. Contact a qualified electrician or reach out to our Customer Happiness team at help@nathanjames.com or 1-866-619-1004.

Questions? Don't worry, we've got the answers

What other light bulbs can fit in this light?

The bulb must not be greater than the max wattage for the fixture. It must match the base size, and the diameter of any area of the bulb should be less than diameter of any area of shade, so that it can fit.

Can I use an LED light bulb?

Yes, so long that the base size matches and the diameter of any area of bulb is less than diameter of any area of shade, so that it can fit.

Is this UL/ETL certified?

Yes, all our products are either UL or ETL.

Do I need an electrician to set up the hardwire?

We recommend using a certified electrician for all hardwiring, although all of our fixtures can be set up without an electrician, as long as you are replacing an existing fixture or have an existing junction box ready for a fixture installation. ENSURE POWER IS OFF WHEN INSTALLING. For all new constructions, please use a certified electrician.

Can I retrofit this hard-wired to a plug-in or vice-versa?

Yes, a plug-in fixture can be turned into a hardwire fixture and a hardwire fixture can become a plug-in fixture. For many products we will provide all the necessary hardware to make these changes, if not, you will need to purchase the necessary hardware.

Is this light compatible outside North America?

Our lighting is only warranted in Canada and the United States.

What do I do if the product is not working?

Try a different light bulb and confirm proper installation.

Can these lights work on a dimmer?

Dimmability is related to the light bulb and the wall switch, not the light fixture. All our hardwire fixtures are compatible with dimmable light bulbs. We recommend using a dimmer switch, as it extends the life of the bulb and allows for energy saving and great ambiance. If using a LED bulb, please ensure both your LED bulb and dimmer switch are compatible.

Can I use the fixture outdoors?

No, this product was not designed to be used outdoors.
