##

LAPMO Research and Testing, Inc. is a product certification body which tests and inspects complete tubes from the supplier's stock to test the material or a workpiece for its compliance with the requirements of the American National Standards Institute. This is done by the use of a certified test of the supplier's factory and workpieces as well as the measurement of the supplier's Quality Assurance System. This testing is subject to the conditions on which the applicable Rules have been set to be performed on any requirements, consistent as provided by LAPMO Research and Testing, Inc. or the product acceptance by Authorities having jurisdiction.

Effective Date: August 2013

Valid After: August 2014

Product: Plumbing Fitting Components

File No: 6737

Issued To: Karping Bear Cartridge Co., Ltd.
 No. 21 Wuliang Dong Road,
 Shuiluo Town,
 Wafang City, GUANGDONG
 China

Identification: Plumbing supply fittings complying with this standard shall be marked with the manufacturer's recognized name, trademark, or other mark in the case of private labeling, the name, trademark or other mark of the customer for whom the fitting was manufactured. The marking shall be accompanied by use of a permanent mark or by placing a permanent label on the product. Markings on plumbing supply fittings shall be visible after installation.

Single-handle, single-control, and automatic compensating mixing bath and shower valves may have identifiable temperature control settings in which the settings are indicated by words "Cold", "Warm", "Hot", etc.), by numbers, or graphically.

Package shall be marked with the manufacturer's name, trademark, or other mark as well as the model number or, in the case of private labeling, the name, trademark, or mark of the customer for whom the fitting was manufactured as well as the model number.

David McKinney
 Chairman, Product Certification Committee

Russ Chang
 CEO, THE LAPMO GROUP

This listing appears on the left side of the month listing on the Effective Date and valid after the shown dates. Any change in materials, manufacturing process, marking or design without notice, will be indicated on the Product Certification Certificate and all products of the supplier's factory and workpieces as well as the measurement of the supplier's Quality Assurance System. This testing is subject to the conditions on which the applicable Rules have been set to be performed on any requirements, consistent as provided by LAPMO Research and Testing, Inc. or the product acceptance by Authorities having jurisdiction. This listing is subject to the conditions on which the applicable Rules have been set to be performed on any requirements, consistent as provided by LAPMO Research and Testing, Inc. or the product acceptance by Authorities having jurisdiction.

Valid After: November 2017

Product:

Plumbing Fixture Fittings

File No. 4528

Issued To:

Nepgerl Inc.
371 Hattawack Heights
Hattawack, NJ 08750

Identification: Each fitting component shall bear permanent legible markings to identify the manufacturer. This marking shall be the trade name, trademark, or other mark known to identify the manufacturer. The product shall also bear all other markings required by the standard. The marking shall be located where it can be readily seen after installation is complete. The product or packaging shall also bear the UPC® certification mark.

Characteristics: Plumbing fixture fitting components to be installed in accordance with the manufacturer's instructions and the requirements of the latest edition of the Uniform Plumbing Code.

Products listed on this certificate have been tested by an IAPMO RPT recognized laboratory. This recognition has been granted based upon the laboratory's compliance to the applicable requirements of ISO/IEC 17025.

Products are in compliance with the following code(s):
Uniform Plumbing Code (UPC®)
National Plumbing Code of Canada

Chairman, Product Certification Committee

CEO, The IAPMO Group

This listing is based on test results as well as the record submitted on the Effective Date and After Date shown above. Any change in material, manufacturing process, including a design without having first obtained the approval of the Product Certification Committee, or any evidence of non-compliance with applicable code and standards or of other nonconformity may be deemed sufficient cause for revocation of this listing. Revocation or extension to the next year for scheduling purposes may be requested only upon prior permission of IAPMO Research and Testing, Inc. Any application of this certificate must be capable of verification of the listing. This document shall not be reproduced or its content

Installation precautions

- a) After opening the product package, please check the completeness of the parts listed in the "Standard Parts List". If there are any defects, please contact your local dealer immediately.
- b) The main part of the faucet has been tested and debugged by the factory. Do not disassemble it by yourself to avoid affecting the performance.
- c) Red and blue plastic wrenches were added to the supply hoses; make sure that the blue one is connected to the right supply valve and the red one to the left valve.
- d) Before installing the faucet, make sure to remove any impurities or sludge in the buried pipeline so as not to block or affect the water output function.
- e) The internal structure of the faucet contains components that are susceptible to high temperatures such as silica gel. Do not install it in high temperature environments or use it at a water temperature exceeding 90°C for a long time.
- f) The faucet functions at a minimum water pressure of 0.5 bar to 7.5 bar maximum.
- g) Do not bend the hose excessively. Make sure that it is not deformed after installation.

Instalation precautions

	No	Part name	Quantity
	1	Main Body	1
	2	Decorative base	1
	3	Silicone gasket	1
	4	Silicone gasket	1
	5	Stainless steel gasket	1
	6	Retaining nut	1
	7	Inlet hose	2
	8	Instruction manual	1

INSTALLATION STEPS

The recommended opening size of mesa is 35-40mm and the maximum thickness is 30mm

Tighten the nut and fasten the screw with a screwdriver

Check whether the gasket is connected to the water inlet pipe by securing it with a wrench

Installation complete

Product size

Usage method

Care and maintenance

1. Wash the surface of the faucet frequently with water, and then dry it with a cotton cloth
2. It is strictly prohibited to use acid cleaning agent to corrode the faucet surface and affect the service life
3. It is strictly forbidden to disassemble each part of the faucet by itself, which can easily cause the risk of water seepage
4. If the tap water output becomes smaller, check whether the inlet pipe and bubbler are blocked by scale and clean up
