★ Screw&shim&Hex nuts
One of them is a backup

K*1

Heagon socket wrench

Please make sure all hardware&packing material fitting the list.
Especially some small accessories may be missing during transportation. Please contact us if you have any question.

step 1

After taking out the cushions (F&D) from the air compression bags, please allow them to recover for a period of time. It may take up to 48 hours to fully recover. You can gently slap on them to speed up the process.

step 2

Screw the legs (H) into each hole on seat frame (A) and back frame (B) as shown, make sure the are tightented.

step 3

Align the screws into the pre-drilled holes on the backrest (B), then use hand to twist the screws (J) for $\frac{1}{3}$ of their length as shown.

step 4

First, align the designated holes on the seat frame (A) with the screws on the backrest (B) from the last step as shown. Then place one shim and one hex nut (J) onto each screw (J), use the hexagon socket wrench (K) provided to tighten both nuts.

step 5

Align the screws into the pre-drilled holes on the armrest (C), then use hand to twist the screws (J) for $\frac{1}{3}$ of their length as shown.

step 6

First, align the designated holes on the seat frame (A) with the screws on the armrest (C) from the last step as shown. Then place one shim and one hex nut (J) onto each screw (J), use the hexagon socket wrench (K) provided to tighten both nuts.

step 7

In the step 6, if the screw assembled on the armrest is difficult to insert into the assembly hole on the seat frame, you can loosen the screw used in the previous step to assemble the backrest, and then insert the screw on the armrest wooden frame into the assembly hole on the seat frame, and then insert the gasket, and then screw on the nut. Before all screws are tightened, keep the side of the backrest flat where it meets the surface of the armrest before tightening all screws.

When you screw, check each screw repeatedly to ensure that each screw can not be screwed until. If the backrest and armrest wobble, use the tools in the parts kit to completely tighten the assembly screws.

step 8

Place the seat cushion (F) on to the sofa.

step 9

Place the back cushion (D) on to the sofa.

Place the armrest cushion (E) on to the sofa.

Tear off the Velcro strip cover before pasting.

step 10

Place the pillow (G) on to the sofa.

step 11

There is a metal buckle inside the carton as a free part.

If you only purchased single part of the sofa, this buckle will not be useful.

If you want to be combined with other sofa components (ottoman, chair, chaise etc), this buckle can be used. Just use this buckle to fix two parts together from the bottom to prevent displacement while using the products.
