Installation precautions

- a) After opening the product package, please check the completeness of the parts listed in the "Standard Parts List". If there are any defects, please contact your local dealer immediately.
- b) The installation size of the faucet should match the installation size of the embedded water inlet pipe.
- c) The main part of the faucet has been tested and debugged by the factory. Do not disassemble it by yourself to avoid affecting the performance.
- d) The faucet must be connected with the hot and cold water pipes. Pay special attention to the hot water on the left and cold water on the right.
- e) Before installing the faucet, be sure to remove the impurities and sludge in the buried pipeline first, so as not to block and affect the water output function.
- f) After installation, please turn on the water source switch, and then check whether the links are tightly connected to ensure that there is no leakage.
- g) The internal structure of the faucet contains non-high temperature resistant components such as silica gel. Do not use it in high temperature environments. Do not use it for a long time at a water temperature exceeding 90 ° C.
- h) It is recommended to use water pressure: 0.05Mpa-0.75Mpa.
- i) Do not bend the hose excessively. Make sure that the hose is not deformed after installation.

INSTALLATION STEPS

| | |
|---|--|
| <p>1</p>  | <p>2</p>  <p>150</p> <p>≈1000</p> <p>S-Union</p> |
| <p>a)The embedded pipeline must be flushed before installing the faucet.</p> | <p>b)The S-Union is wrapped with raw material tape and connected with the buried outlet pipe joint.</p> |
| <p>3</p>  | <p>4</p>  <p>seal washer</p> |
| <p>c)According to the size of the shower pipe, the fixing base is fixed on the wall with self-tapping screws.</p> | <p>d)Tighten the main body and the S-Union, and fix the shower pipe to the upper wall fixer at the same time.</p> |
| <p>5</p>  | <p>6</p>  |
| <p>e)Connect the hand shower and head shower to the shower pipe and the main body separately.</p> | <p>f)Turn on the water source switch and check whether there is water leakage at each connection.</p> |

To keep the surface of the faucet smooth and bright, please follow the procedure below:

- a) Often clean the surface of the faucet with water, and dry the faucet with a soft cloth.
- b) Do not rub the surface of the faucet with detergents such as polishing powder and decontamination powder to avoid abrasion and scratching the product.
- c) Never use acid detergent to clean the faucet, so as not to cause acid detergent to corrode the faucet plating layer.
- d) When using the product, please do not operate the movable parts of the product with force, so as not to affect the service life of the product.
