Tools Required:
- Socket Set (including 5/8" & 9/16")
- Rubber Mallet
- Adjustable Wrench

Installation Steps:
1. Turn tub over and set on non-abrasive mat, insert pyramid bolts into the mounting slot at the bottom of the tub.
2. Align the feet with the bolt, insert leg, washers and nut and tighten loosely, the legs are to be installed in the front side and back side.
3. Adjust leg for proper fit, it might be necessary to tap with rubber mallet to ensure a good position.
4. Retighten bolts.
5. When all four legs have been installed, turn tub over carefully as not to damage the finish.
6. If tub wobbles, adjust leg by raising or lowering leg adjustment bolt at the bottom of each leg.
7. Apply cushions to the bottom of each leg.
   (included in your installation package)

Cleaning
Clean with a damp cloth only.
Avoid using metal or abrasive polishes.
