1

If the floor is uneven, adjust the levelers on the bottom of the legs as needed to make the top level.

- Place the nightstand against the wall at the desired location. Locate and mark the wall stud behind the nightstand.
- Mark the stud location on the back of the nightstand. Attach one of the brackets (HW3) to back of the nightstand by screwing in the small screws (HW1).
- To keep the hardware out of view after installation, attach the remaining Bracket (HW3) 2 inches below the bracket that's attached to the back of the nightstand. Use the large screws (HW2) to attach the remaining bracket to the wall.
- Move the nightstand into place. Align the 2 brackets and then connect them with the Retention Belt (HW4).
- Confirm Belt is securely laced and locked.

Place the nightstand in the place where you will use it. We'd love to see it — just tag us (we're @safavieh) and use the hashtag #safavieh on Instagram!
