Assembly Required	No	Backsplash Height	4 inches
Faucet Hole Spacing(in.)	8 in.widespread	Sink	Single Undermount Sink
Power Outlet	Yes	Adjustable Shelf	Yes

Before You Begin

- **WARNING: Risk of serious or fatal injury.** To avoid tipping over, the cabinet must be placed on a level surface or it can be secured to the wall according to the instructions.
- **CAUTION: Risk of personal injury or property damage.** Mount the vanity to the wall (mounting hardware not included). Ensure the Vanity is securely fastened using suitable hardware based on your wall type. Exercise caution to avoid disrupting any hidden electrical or water lines present within the wall.
- **CAUTION: Risk of personal injury or property damage.** Product can break, chip, or cause injury if handled carelessly.
- **CAUTION: Risk of product damage.** Do not modify the vanity. Doing so will compromise structural stability.
- **CAUTION: Risk of product damage.** Do not sit or stand on the cabinet.
- **CAUTION: Risk of product damage.** Use care when moving the cabinet to avoid impacting, sliding, or side-loading the legs.
- **CAUTION: Attention to Electrical Safety.** Since the bathroom cabinet contains power socket, please ensure separation of water and electricity during installation and use to avoid personal injury.

NOTICE:

Follow all local plumbing and building codes.

Two people should perform this installation.

1. Secure the Vanity

➤ **Mount the vanity to the wall (mounting hardware not included).**

Ensure the Vanity is securely fastened using suitable hardware based on your wall type. Exercise caution to avoid disrupting any hidden electrical or water lines present within the wall.

2. Adjust the Shelves

- From under the shelf, remove the screws securing the shelf in place.
- Remove the shelf.
- Adjust the position of the shelf by moving the shelf pins to the side holes at the desired height.
- Replace the shelf and use the screws to secure the shelf in place.

Vanity Care & Maintenance Guide

➤ **Cabinet Door:**

- Water should NOT have any contact with the cabinet door.
- To maintain your cabinet make sure to repair and hinges or handles if loose.
- To clean, use a damp rag. cabinets are an easy to maintain.
- Heavy articles should not be placed on the cabinet, for example: heavy cleaner or glass articles.

➤ **Cabinet Frame:**

- In any case of a leakage make sure the cabinet does not overflow with any liquid for any period of time as it will swell.
- All the articles placed in the cabinet should be dry.
- The cabinet should always remain dry.

➤ **Accessories:**

Keep salt, hair dye and make up away from the any accessories, clean them while they are adhered with it.

➤ **Engineering Stone:**

- Do keep the countertop as dry as possible.
- Do recommend to only use water to wash the countertop (no mild dish soap, cleaner, detergent), and try the countertop by soft cloth as soon as possible.
- Do keep the countertop clean and away from acidic (ex. citrus juice, vinegar, and wine) or oily substances (ex. edible oil, butter, and cream).
- Do prevent strong chemicals from contacting the top surface of the countertop.
- Do avoid exposure to strong chemical articles, like additive metal abluent, and stove abluent as they can damage the countertop.
- Do not place high-temperature objects directly on countertop for a long period (ex. a fresh hot cup of coffee).
- Do not place high-temperature appliances directly on the countertop as it will damage the stone (ex. iron).
- Do regular maintenance: Waterproofing treatment is generally conducted every 2 to 3 months, and the specific frequency can be adjusted according to the usage and environmental conditions.
