Installation tool

Start assembling

1.Remove the layer plates and the front and rear baffles and install them with large screws

2.Remove the table legs and install them with large screws

3.Continue to remove the table legs and install them with large screws

4.Remove the hinges and install them with small screws

5.Remove the bracket and the pin and install them with small screws

6.Take out the stand and fix it to the table legs with small screws (align the bottom and then tighten the screws)

7.Similarly, install another bracket

8.Remove the large and small desktops as well as the hinges and fix them with small screws

9.Then fix the large and small tables to the table legs with large screws
