Step 1

Let's get this thing fired up! Start by screwing Cam Bolts (1) into the Top Panel (A), Side Panel Left (B), Side Panel Right (C), and Bottom Panel (F), in the holes indicated below.

1

x 18pcs

Step 2

Grab your screwdriver for this step! Use the Cam Locks (2) secure the Back Panel (Left) (D) to the Side Panel (Left) (B).

2

x2pcs

How to use cam locks

Did you know?

Cam locks are used to join two panels together, usually the edge of one to the flat side of another.

First, your cam bolt (or cam pin) will need to be properly inserted into the flat side of the board.

Important Note: Only tighten the cam bolt until it is secure. Do not over-tighten.

Next, you will fit the proper hole on the edge of the associated joining panel over the cam bolt.

Important Note: When installed properly, the head of the cam bolt will be visible through the larger hole on the side of the joining panel.

Next, you will notice the cam lock has a “C” shaped back. Commonly, an arrow on the front of the cam lock points in the same direction as the open section on back.

Using these as your cue, insert the cam lock into the large hole so the opening of the “C” fits over the head of the cam bolt.

Using a screwdriver, you will turn the cam lock until it stops, usually at 90° or 180°. You will feel the panels pulling closer until they are secured.

Important Note: Only turn the cam lock until the panels are fully engaged & feel secure. Turning too far may lead to hardware failure.

Still having issues?

If a cam lock seems to be spinning in place or is not “catching” or pulling the panels together as expected, first remove the cam lock & try again while making sure that everything is properly positioned & oriented.

If you are still having issues getting things working as expected, first remove the cam lock then unscrew the cam bolt slightly (less than 1 complete turn) to see if that helps with the alignment of the cam lock & bolt.

2

x2pcs

Step 3

Don't put your screwdriver away quite yet! Use the Cam Locks (2) to secure the Back Panel (Right) (E) to the Side Panel (Right) (C).

Step 4

Now secure the panels (C) and (E) from Step 2 to the Top Panel (A).

2

3

x4pcs

x2pcs

Step 5

No, this isn't Deja Vu! Now secure the (D) and (B) panels to the Top Panel (A).

②

③

x4pcs

x2pcs

holes on back

Step 6

Next, insert the Wooden Dowels (3) into the Side Panel (Right) (C) and the Side Panel (Left) (B). Then, secure the Bottom Panel (F) to the Side Panels and Back using the M4 x 35mm Screws (4).

②

x4pcs

③

x4pcs

④

x6pcs

Please be careful not to use the wrong screw when installing Bottom Panel (F).

(4) M4 x 35mm Screw

(16) M4 x 40mm Screw

Step 7

First, secure the Top Stretcher (Front) (H) to the Side Panels using the Cam Locks (2).

2

x 2pcs

4

x 3pcs

Then, with the large holes facing upwards, secure the Top Stretcher (Front) (H) in place using the M4 x 35mm Screws (4).

Please be careful not to use the wrong screw when installing Top Stretcher (Front) (H).

(4) M4 x 35mm Screw

(16) M4 x 40mm Screw

Step 8

Secure the Magnetic Door Catch (5) to the Top Panel (A) using the M3 x 15mm Screws (6).

Tip! Door Catcher can be adjusted from front to back for proper door alignment.

Step 9

Screw the four Legs (I) into the Bottom Panel (F). Consider this your workout for the day!

Step 10

Shut the front door – you’re only five steps away from being done. Speaking of doors – grab the Left (J) and Right (K) doors and secure the four Hinges (7) onto them. Secure the Metal Catch Plate (11) to the tops of the doors, too!

Step 11

Next, place the Shelf Pins (9) at your desired shelf height before carefully sliding the Shelf (G) to rest on top of the pins.

9

x 4pcs

8

x 16pcs

Step 12

It's all coming together! Secure the doors to the unit using the M4 x 14mm Screws (8).

Is your cabinet door looking crooked or unevenly spaced?

Then you've come to the right place. Follow the illustrations below to get your cabinet door aligned and ready for action.

If your door is too low or too high...

Loosen the height screws, then move the door up or down to make it level.

If the space between your doors is off...

Loosen the side-to-side screws, then screw counter-clockwise to make the gap wider or clockwise to close any gaps.

If you need to adjust the depth of the doors...

Adjust the in-and-out screws until the door is aligned with the side of the cabinet.

Step 13

Time for the finishing details!

HELPFUL TIP:

Adjust the levelers to help balance the cabinet, if need be.

Is your cabinet door looking crooked or unevenly spaced?

If you're still having trouble lining everything up, your next step should be to try to adjust the feet slightly to square up the cabinet & doors. Follow the illustrations below:

If the right door appears to be hanging low, you can adjust the adjustable leveler on the front right until the door is better aligned.

If the left door appears to be hanging low, you can adjust the adjustable leveler on the front left until the door is better aligned.

Step 14

Safety first! Secure the Plastic Bracket (13) to the back of the unit using two M3.5 x 15mm Screws (12). Next, feed the Plastic Tether (14) through the Plastic Bracket that you just installed.

12

x 2pcs

13

x 1pc

14

x 1pc

Step 15

Find where you want your storage unit to live and then mount the Plastic Bracket (13) to the wall using the provided Wall Anchors (15) and M4 x 40mm Screws (16).

We recommend using a 1/4" drill bit. Last, but not least, loop the Plastic Tether (14) through both brackets to safely secure the unit to the wall. You did it! Time for a celebratory pizza? The answer to that is always yes!

Prepare your wall for Anti-Tip Kit Installation

Recommended Drill Bit:

1/4" Drill Bit

IMPORTANT NOTE:

Young children (and/or pets) can be seriously injured by tipping furniture units.

You must install the provided anti-tip kit hardware solution, as instructed, to prevent the furniture units from tipping over - which could possibly lead to injuries or damage.

The provided anti-tip kit hardware solution is intended only as an additional safety measure & deterrent; it is not a substitute for proper adult supervision.

The provided anti-tip kit hardware solution is not an earthquake restraint. If you wish to add the extra security of earthquake restraints, they must be purchased & installed separately.

Replacement

You

We really don't want you to go through the hassle of re-packaging your item
and sending it back, because let's be honest...nobody has time for that.

Safety first, fun later

We want your product to last as long as possible, so we recommend that you tighten the screws 2 weeks after assembly and for added safety check the tightness of all screws every 2 months.

For proper care and treatment, please check our website at **NathanJames.com/products**

Safe use of this product starts with you.

Use this product responsibly with the primary concern for your safety. Follow assembly instructions carefully and inspect product upon receipt and each use.

Nathan James and its parent companies cannot be held legally responsible for any injuries or death resulting from failure to follow instructions or improper use of this product.

Do not modify the structure of this product in any way.

Our products have been tested to meet specific safety measures as they were originally intended to be sold. Any modifications will present the risk of creating significant safety issues which NJ will not be responsible for.

Proper use

- | | |
|---------------|--------------------------------------|
| DO NOT | use for commercial purposes |
| DO NOT | frolic on storage unit |
| DO NOT | use storage unit as foot stool |
| DO NOT | leave spilled liquid on storage unit |
| DO NOT | use if damaged |
| DO NOT | make temporary repairs |
| DO NOT | use outdoors |

We are only in business if you're happy
