The goods

IMPORTANT

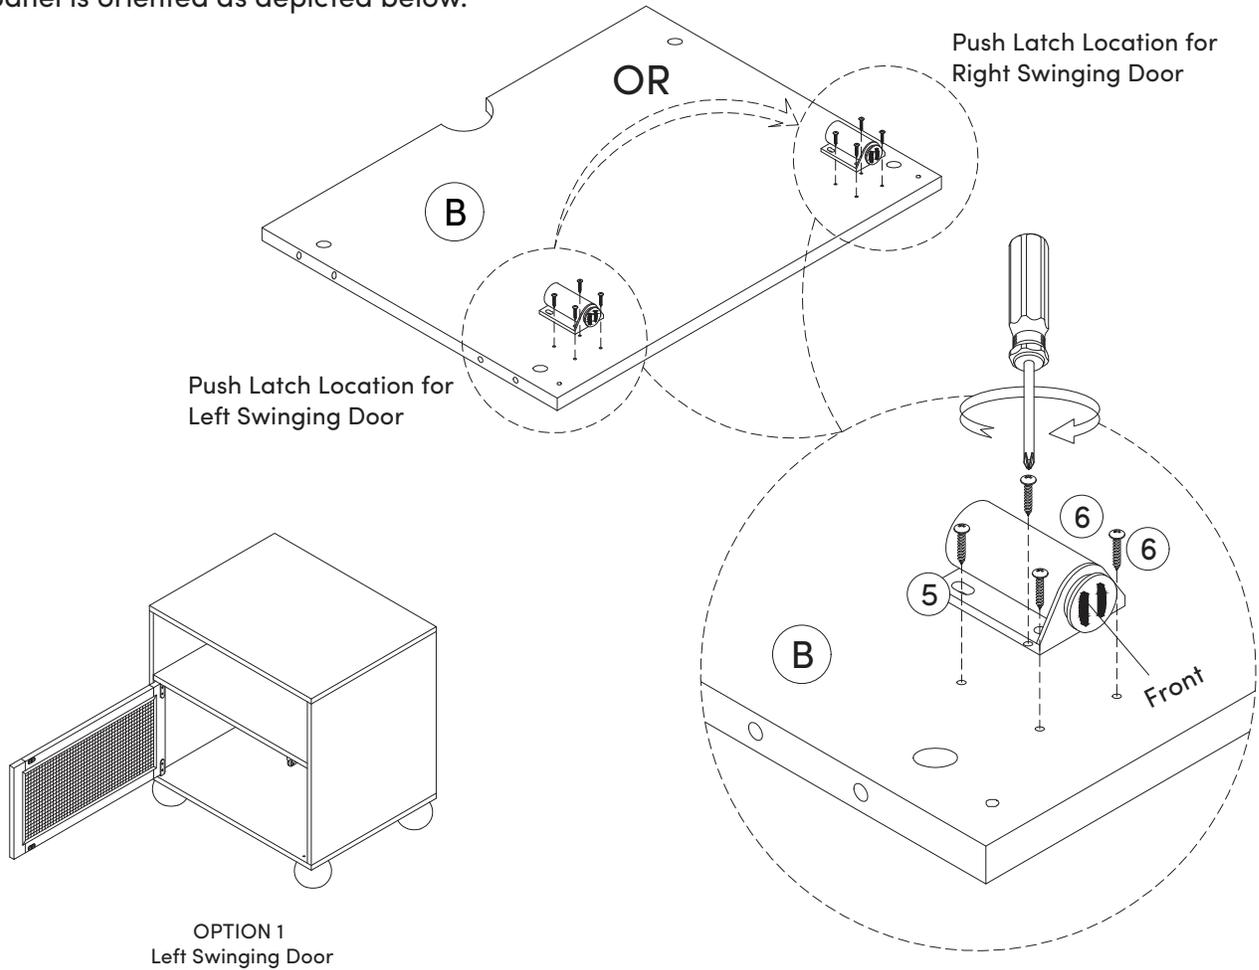

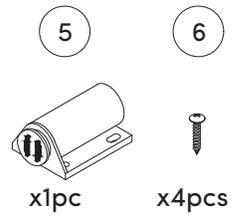

1. Do not tighten bolts / screws completely until all bolts / screws are lined up and inserted into holes.
2. Do not over tighten screws and bolts to avoid stripping.
3. Please use hand tools to assemble this product. Do not use power tools.

Step 1

Let's get this thing fired up! Secure the Magnetic Push Latch (5) to the Shelf (B) using the M3x15mm Screws (6).

If you would like your door to open to the left once fully assembled, screw the Magnetic Push Latch (5) into the set of holes on the left side of the panel when the panel is oriented as depicted below.

If you would like your door to open to the right, screw the Magnetic Push Latch (5) into the set of holes on the right side of the panel, when the panel is oriented as depicted below.

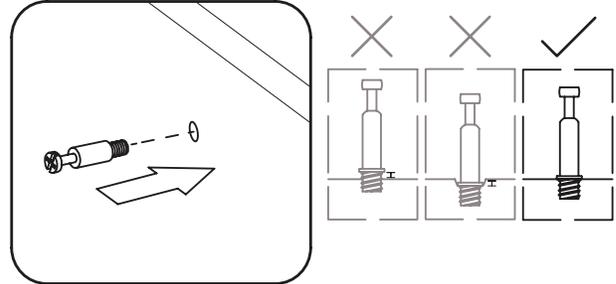

How to use cam locks

Did you know?

Cam locks are used to join two panels together, usually the edge of one to the flat side of another.

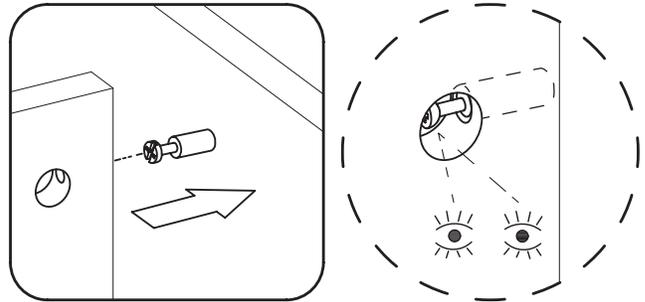

First, your cam bolt (or cam pin) will need to be properly inserted into the flat side of the board.

Important Note: Only tighten the cam bolt until it is secure. Do not over-tighten.

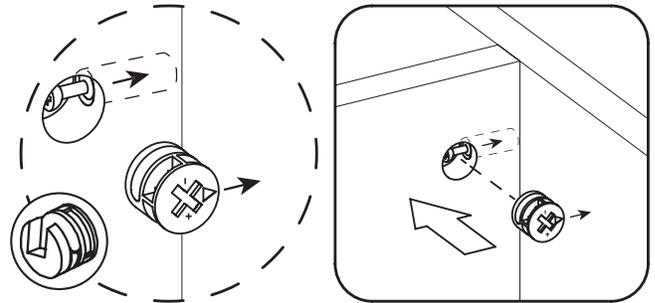

Next, you will fit the proper hole on the edge of the associated joining panel over the cam bolt.

Important Note: When installed properly, the head of the cam bolt will be visible through the larger hole on the side of the joining panel.

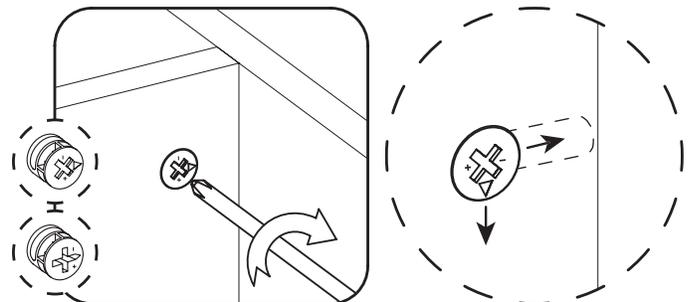

Next, you will notice the cam lock has a “C” shaped back. Commonly, an arrow on the front of the cam lock points in the same direction as the open section on back.

Using these as your cue, insert the cam lock into the large hole so the opening of the “C” fits over the head of the cam bolt.

Using a screwdriver, you will turn the cam lock until it stops, usually at 90° or 180°. You will feel the panels pulling closer until they are secured.

Important Note: Only turn the cam lock until the panels are fully engaged & feel secure. Turning too far may lead to hardware failure.

Still having issues?

If a cam lock seems to be spinning in place or is not “catching” or pulling the panels together as expected, first remove the cam lock & try again while making sure that everything is properly positioned & oriented.

If you are still having issues getting things working as expected, First remove the cam lock, then unscrew the cam bolt slightly (less than 1 complete turn) to see if that helps with the alignment of the cam lock & bolt.

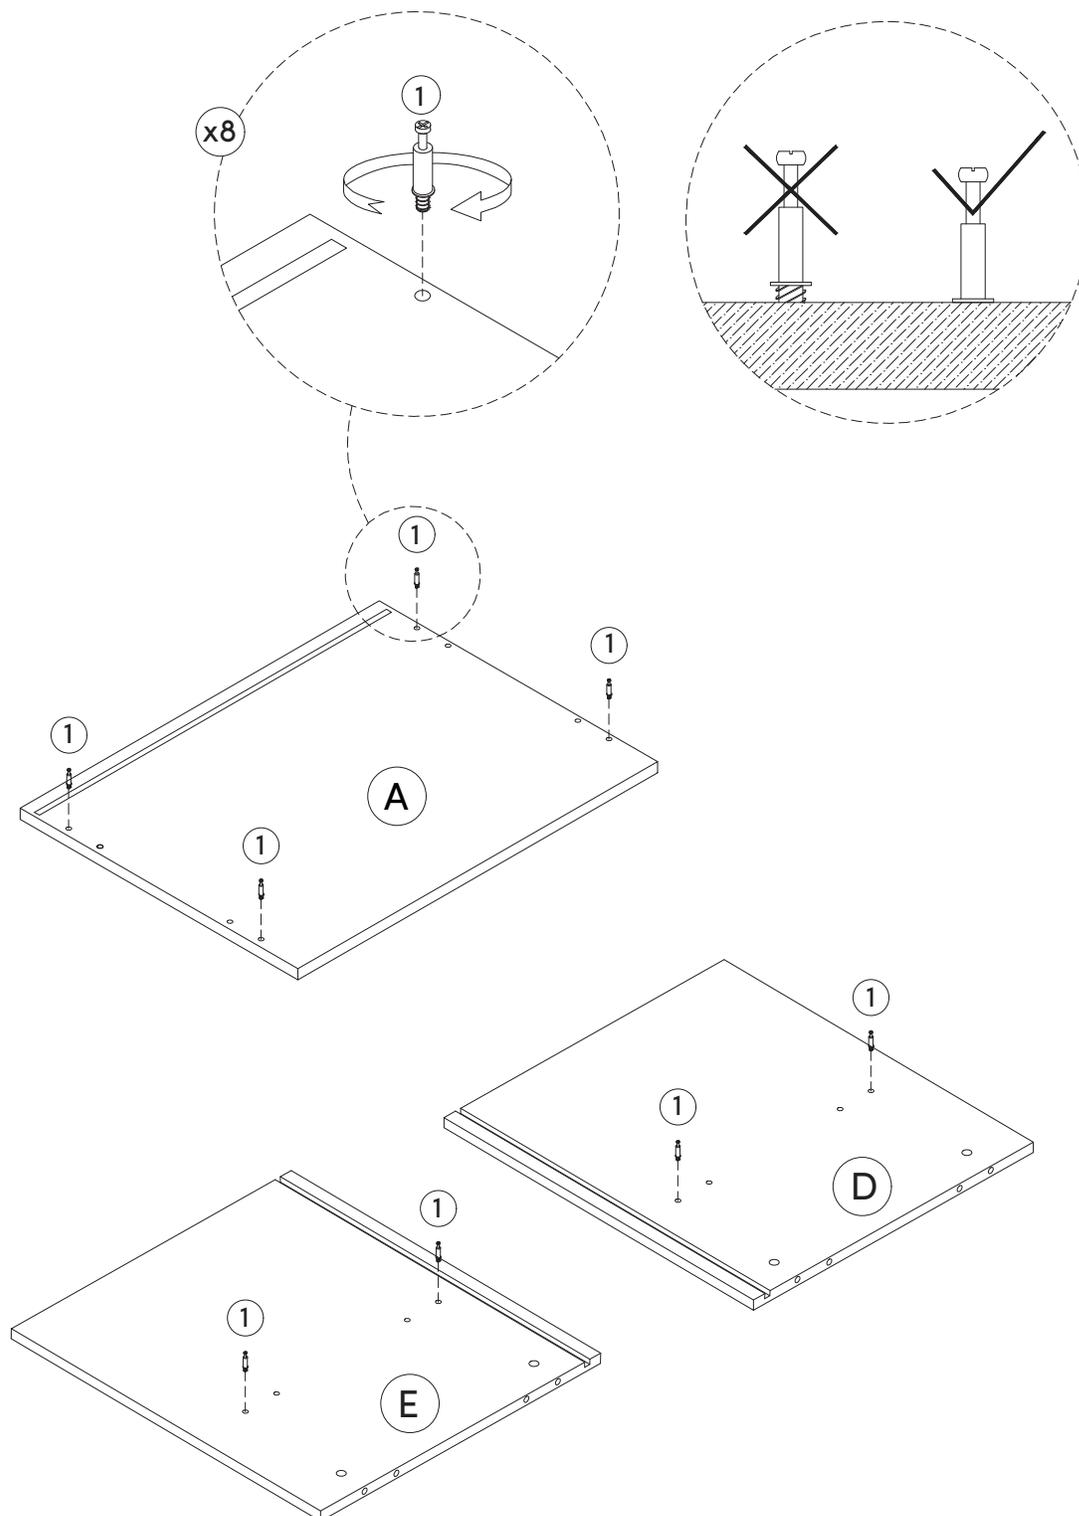

Step 2

Screw the Cam Bolts (1) into the Top Panel (A), the Side Panel (Left) (D), and the Side Panel (Right) (E).

1

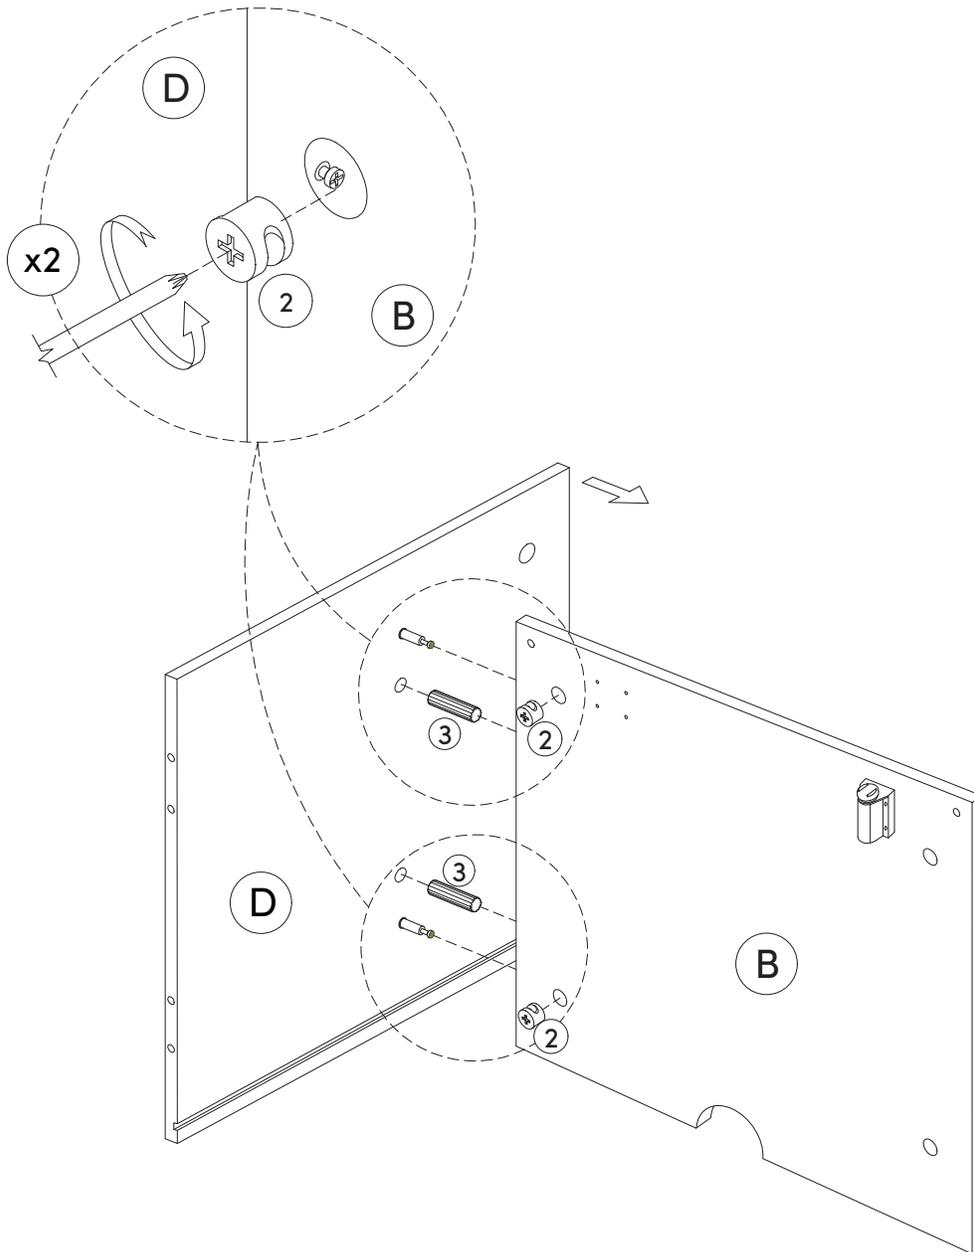

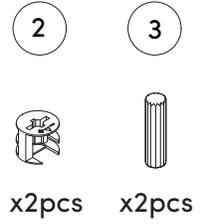

x8pcs

Step 3

Insert two Wooden Dowels (3) into the Shelf (B). Then place the Side Panel (Left) (D) over the Wooden Dowels (3). Make sure to line things up as shown below. Finally, use the Cam Lock (2) to secure the Shelf (B) and the Side Panel (Left) (D) together.

Step 4

Insert another two Wooden Dowels (3) into the end of the Shelf (B). Then place the Side Panel (Right) (E) over the Wooden Dowels (3). Make sure to line things up as shown below. Finally, use the Cam Lock (2) to secure the Shelf (B) and the Side Panel (Right) (E) together.

3

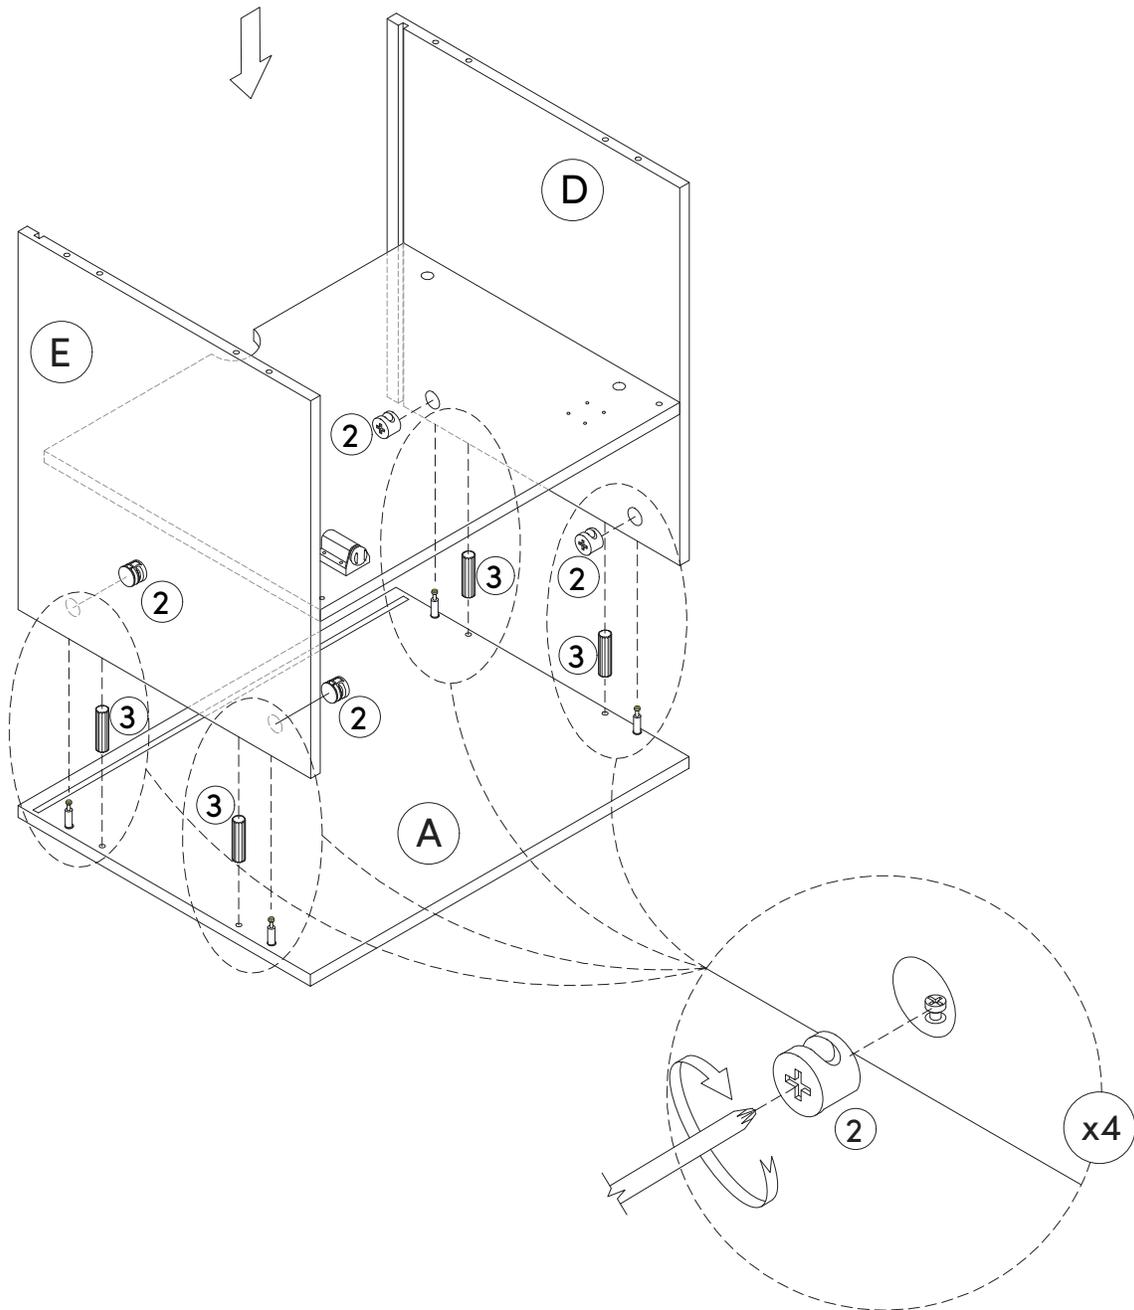

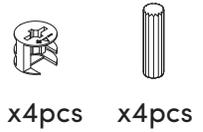

x2pcs

x2pcs

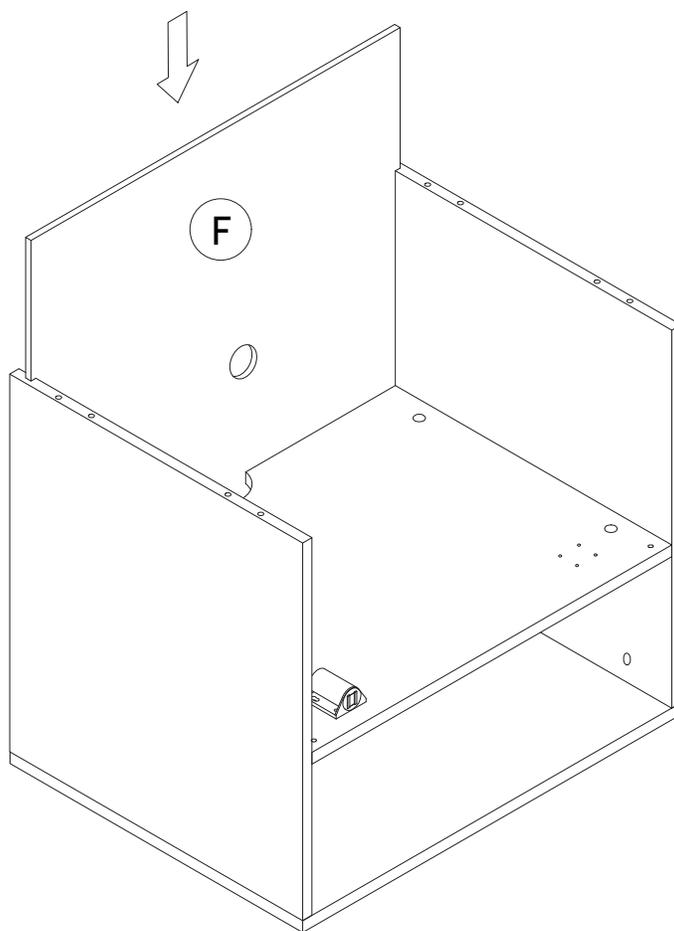

Step 5

Again, insert four more Wooden Dowels (3) into the Top Panel (A). Then place the assembly from Step 4 atop the Wooden Dowels (3). Make sure to line things up as shown below. Finally, use the Cam Lock (2) to secure the Top Panel (A) and the unit together.

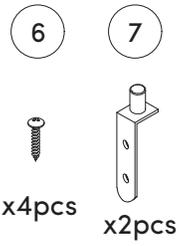

Step 6

Slide the Back Panel (F) into place.
It should fit smoothly into the grooves.

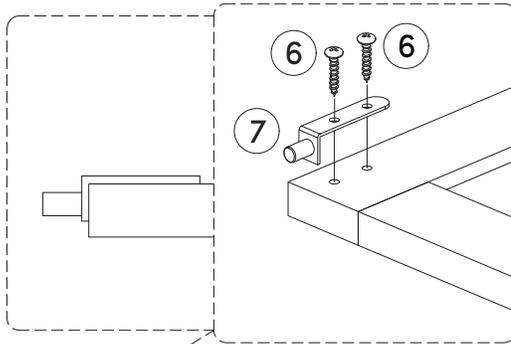

Step 7

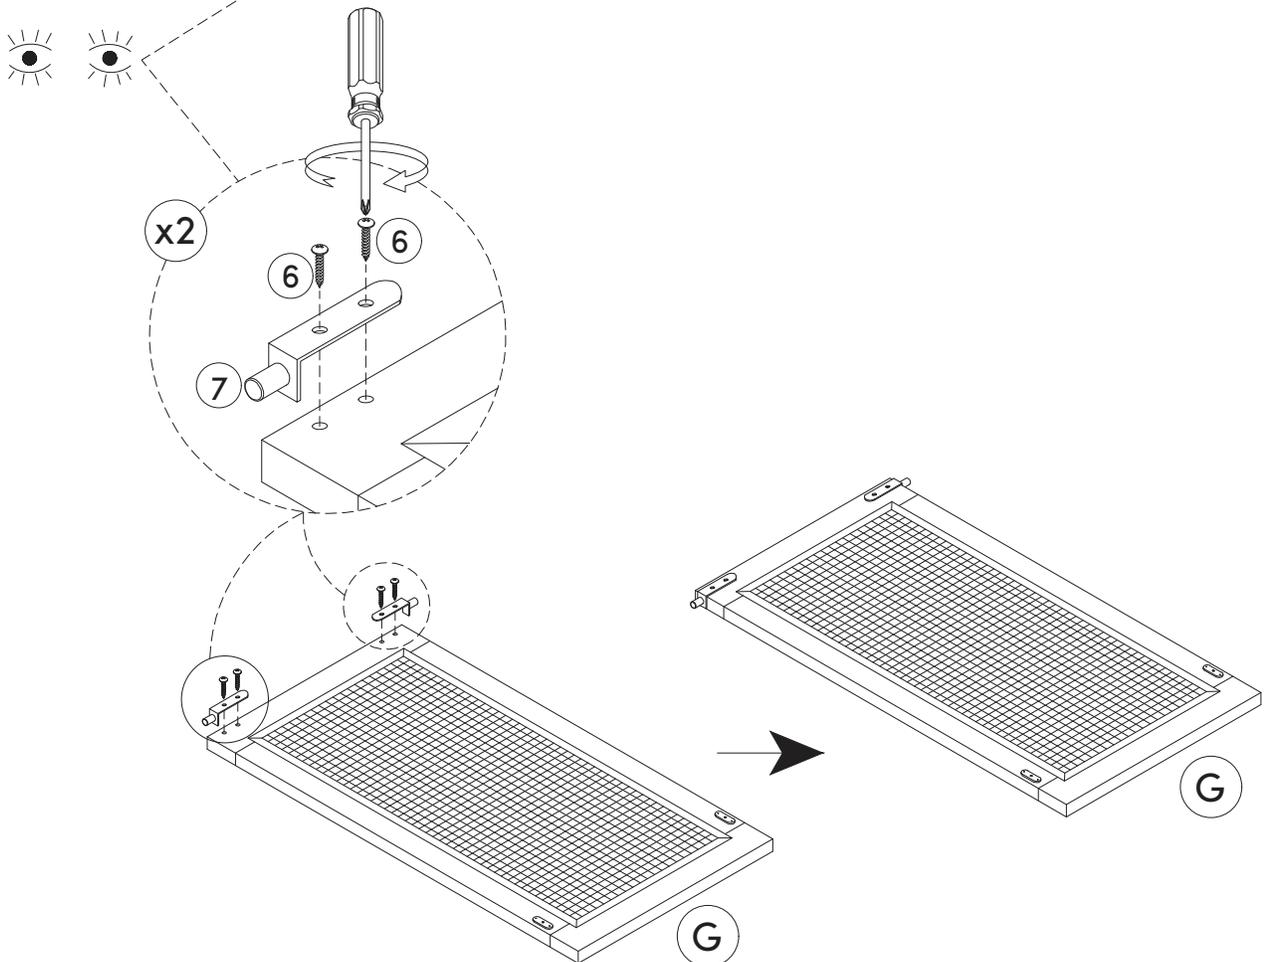

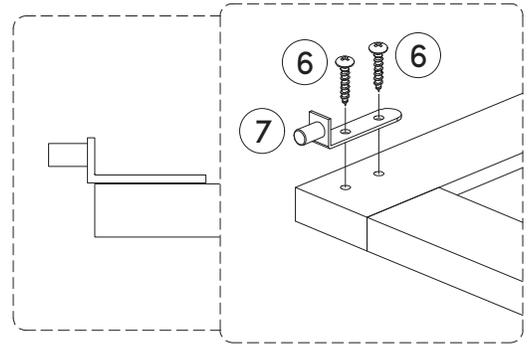

Secure the Metal Pin Hinges (7) to the Door (G) using the M3x15mm Screws (6).

✓ correct Part G orientation

✗ incorrect Part G orientation

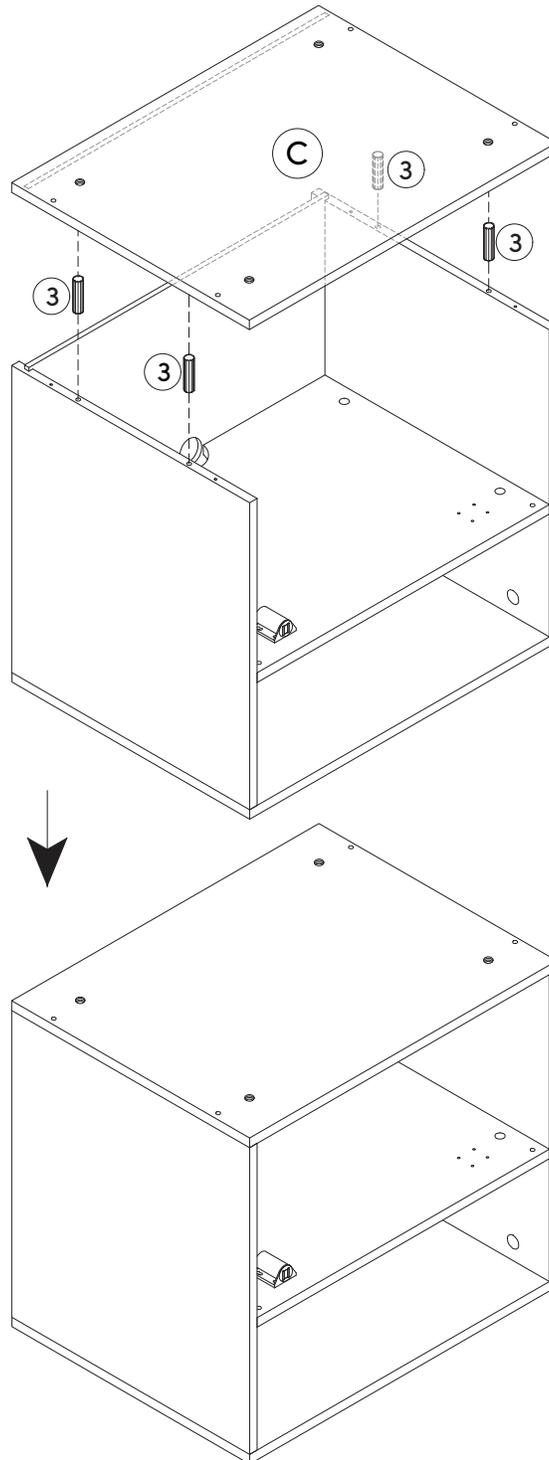

Step 8

Insert the Wooden Dowels (3) into the end of the Side Panels.
Then place the Bottom Panel (C) atop the Wooden Dowels (3).
Make sure to line things up as shown below.

3

x4pcs

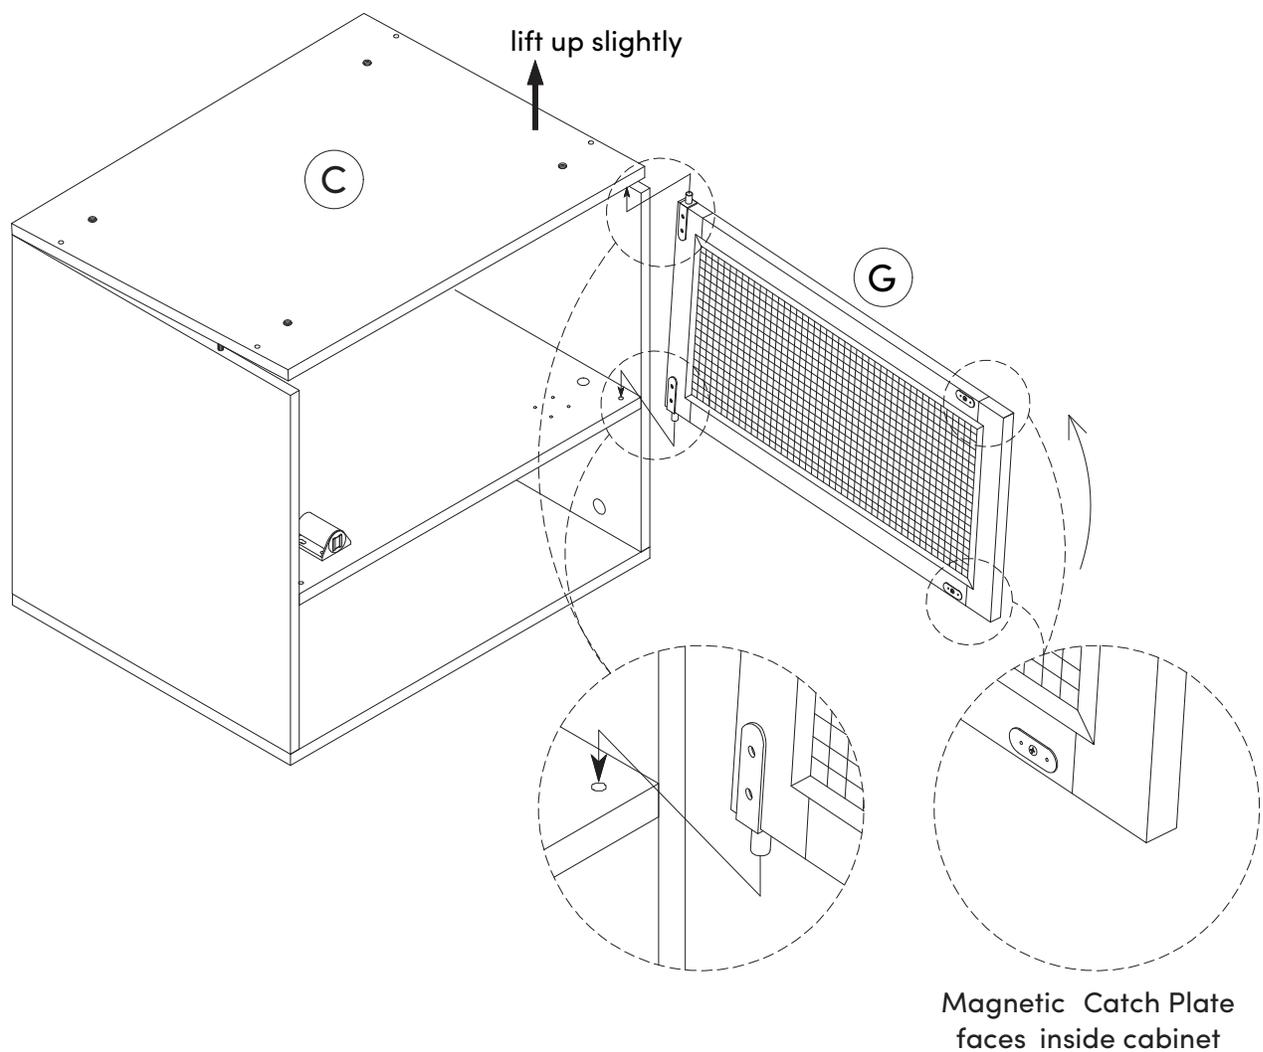

Step 9

Let's get the door installed!

Decide whether you want the door to open facing left or right and then make sure the Magnetic Catch Plate faces the inside of the cabinet.

Carefully lift up the Bottom Panel (C) to allow the Door (G) to fit in its intended position, before sliding the Metal Pin Hinges into their respective holes.

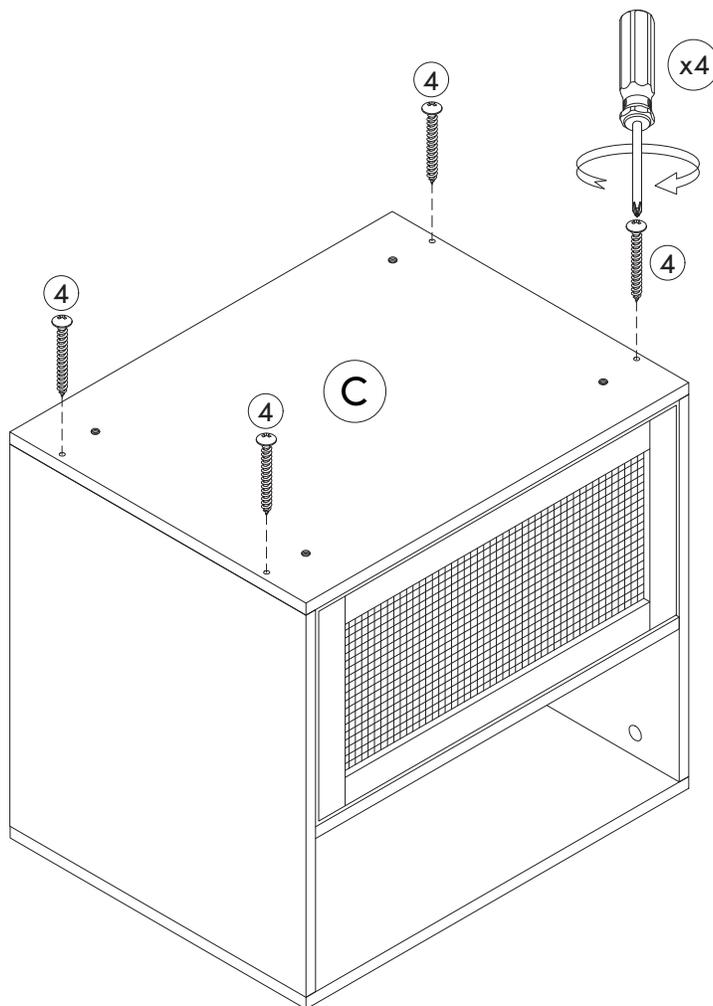

Step 10

Use the M4x35mm Screw (4) to secure the Bottom Panel (C) to the unit.

4

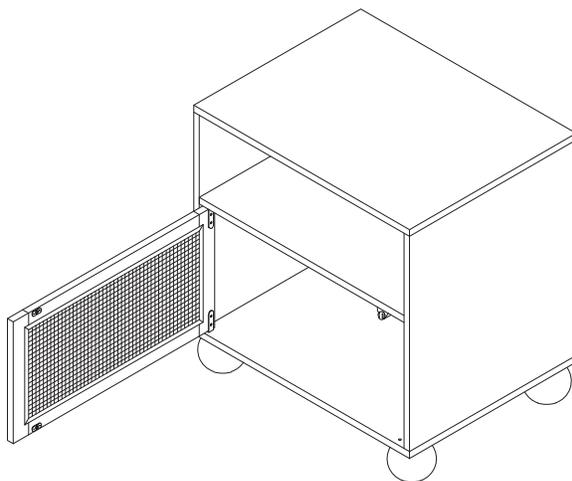

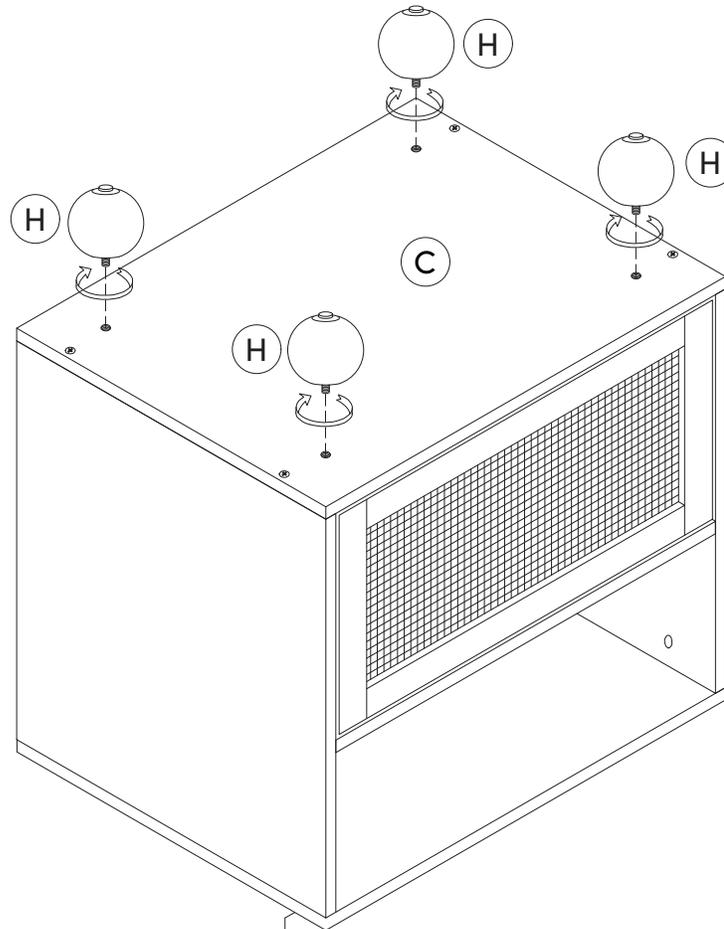

x4pcs

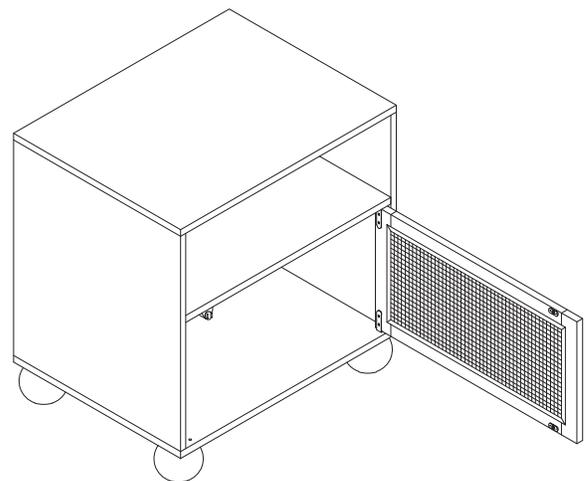

Step 11

Secure the Feet (H) in place by turning them clockwise as shown below.

OPTION 1
Left Swinging Door

OPTION 2
Right Swinging Door

Replacement

You

We really don't want you to go through the hassle of re-packaging your item and sending it back, because let's be honest...nobody has time for that.

Safety first, fun later

We want your product to last as long as possible, so we recommend that you tighten the screws 2 weeks after assembly and for added safety check the tightness of all screws every 2 months.

For proper care and treatment, please check our website at NathanJames.com/products

Safe use of this product starts with you.

Use this product responsibly with the primary concern for your safety. Follow assembly instructions carefully and inspect product upon receipt and each use.

Nathan James and its parent companies cannot be held legally responsible for any injuries or death resulting from failure to follow instructions or improper use of this product.

Do not modify the structure of this product in any way.

Our products have been tested to meet specific safety measures as they were originally intended to be sold. Any modifications will present the risk of creating significant safety issues which NJ will not be responsible for.

Proper use

- DO NOT** use for commercial purposes
- DO NOT** place on uneven floor or surface
- DO NOT** use as a step-stool or stand on nightstand
- DO NOT** put hot liquid directly on nightstand
- DO NOT** leave spilled liquid on nightstand
- DO NOT** use if nightstand is damaged or broken
- DO NOT** make temporary repairs
- DO NOT** use outdoors

We are only in business if you're happy
