## Important Notes:

Install this product according to the installation manual. Professional installation is recommended.

This model has 3/8" of adjustment for out-of-plumb wall conditions within the wall profile.

This model requires that you drill into the threshold for proper installation.

If this unit is going to be installed in a new construction, please, install all of the required plumbing and drainage before installing the shower. Use a competent and licensed (if required by local code) plumber for all plumbing installation period.

## Important Disclaimers:

Please read Installation Manual thoroughly prior to installing this product.

Prior to installation, please ensure that the installation surface is finished, level and solid and will be able to support the total weight of the unit. Also, make sure that the walls are plumb. Irregular installation, surface level or out of square conditions can result in serious problems for your installation.

Please note that you should consult your local building codes with questions on installation compliance standards. Building and plumbing codes may vary by location, and DreamLine® is not responsible for code compliance standards for your project and will not accept any returns.

The Aqua Ultra tub door is NOT suitable for commercial installation.
